After reviewing hundreds of digital cameras and photo services in his weekly New York Times column, David Pogue knows digital photography. With this new *Missing Manual*, you will get expert advice on how to choose a digital camera including information on the only specs that matter. Hint: it's not about megapixels. Learn the basics of lighting, composition and shooting lots of photos. Understand how to choose the best camera settings for 20 different scenarios. Unravel the problems of correcting images and storing them. Learn David's tips and tricks for sharing and printing images. Get a special troubleshooting section you can turn to when things go wrong. David Pogue's witty, authoritative voice has demystified the Mac, Windows, iPods and iPhones for millions of readers. Now he offers step-by-step instructions and plenty of friendly advice to help you join in the fun and get real satisfaction from digital photography.

**Understanding Digital Cameras** Jon Tarrant, 2007 The best photographs start with proper attention behind the camera before the image is shot. The author explains how digital cameras work, helping the reader to achieve professional-looking results without digitally manipulating after the shot.

*How to Photograph the Moon and Planets with Your Digital Camera* Tony Buick, Philip Pugh, 2011-01-25 Although astronomical CCD cameras can be very costly, digital cameras the kind you use on holiday on the other hand are relatively inexpensive. Moreover, their technology, especially thermal noise sensitivity, ISO number and resolution, has progressed to a point where such cameras are more than capable of photographing the brighter astronomical objects. Now Tony Buick has teamed up with fellow author and astro imager Phil Pugh to produce a completely revised, updated and extended second edition to *How to Photograph the Moon and Planets with your Digital Camera*, first published in 2006. The revisions take into account changing and improving camera technology and some items which are now available commercially but which previously had to be home-made. The section of solar observing has been expanded to include observing by H-alpha light and among the many additional sections are photographing the constellations, aurorae and basic post-imaging processing.

*The Lens* NK Guy, 2012-10-08 Which lens should I buy for my camera? It's such a simple question but choosing the right lens or lenses is actually one of the most important photographic decisions you can make. Nothing affects the quality of a photo more than the lens. It's no longer just about the megapixels; it's the glass that makes all the difference. Many first-time buyers of DSLRs don't venture past the basic lens included in the box. While some

are reluctant to spend more money others are confused by all the buzzwords or are overwhelmed by all the choices out there It s really a shame because interchangeable lenses give you amazing scope for quality photography Take in vast sweeping scenes with a wide angle lens Capture faraway birds with a telephoto lens Examine the tiniest detail of a flower with a macro lens Record the perfect portrait with a prime lens Anything is possible when you choose the right lens for the job This book isn t a simple catalogue of available lenses New products are coming out all the time and comparing specific lenses can be difficult Instead author N K Guy gives you all the information you need to make smart buying decisions Optical technology is demystified arcane terminology is decoded and practical tips are provided The Lens will help you build the perfect lens collection to suit your needs now and in the future      **HWM** ,2005-12 Singapore s leading tech magazine gives its readers the power to decide with its informative articles and in depth reviews      **Information Retrieval Technology** Gary Geunbae Lee,2005-10-11 This book constitutes the refereed proceedings of the Second Asia Information Retrieval Symposium AIRS 2005 held in Jeju Island Korea in October 2005 The 32 revised full papers and 36 revised poster papers presented were carefully reviewed and selected from 136 papers submitted All current issues in information retrieval are addressed applications systems technologies and theoretical aspects of information retrieval in text audio image video and multi media data The papers are organized in topical sections on relevance retrieval models multimedia IR natural language processing in IR enabling technology Web IR question answering document query models a special session digital photo album TDT clustering multimedia classification and two poster and demo sessions      **eBay For Dummies** Marsha Collier,2014-01-10 The leading guide for eBay buyers and sellers updated to give you all the essentials for buying and selling on eBay More than 112 million people regularly use eBay To find the best deals and make the best profits you need the guidance in this book from eBay expert Marsha Collier With more than half a million copies sold in previous editions it s packed with solid advice to help you get started navigate the site make winning bids and learn to list and sell your own items successfully This edition explores eBay in the context of sites like Amazon Facebook and Pinterest and adds in depth information on managing multiple auctions creating a store knowing the market marketing your sales and more Written by eBay expert Marsha Collier a highly sought after speaker and trainer on eBay and social media business topics eBay remains among the leading e commerce sites with more than 112 million users This is the top selling eBay reference and the perfect guide for beginners covering everything you need to know to register navigate the site find bargains make winning bids and list and sell items Includes important tips about shooting and posting photos communicating with bidders shipping items collecting payment listing multiple items knowing your market and maintaining your privacy Also offers advice on troubleshooting reporting abuses joining the eBay community and services that improve the eBay experience eBay For Dummies 8th Edition is the latest and greatest go to guide for anyone interested in finding bargains and making money on eBay      *Photography* Mr. Rohit Manglik,2024-03-11 EduGorilla Publication is a trusted name in the education sector
