Uncommon Law of Learned Writing 2.0 Chinua Asuzu, 2023-09-10 As lawyers we must not in hot pursuit of common law outrun common sense The dread of that eventuality prompted this book *Uncommon Law of Learned Writing 2.0* promotes common sense in legal language Plain language which is commonsensical broadens access to legal documents thus democratizing the law If democracy is government of the people by the people and for the people law is the language in which government interacts with the people it's the language of democracy The people whose government speaks through law must understand what is said No democratic society should brook legalese a dense verbose dialect known only to lawyers What then should society do to redress the lawyer induced obscurity A Shakespearean character had an alarming proposal The first thing we do let's kill all the lawyers Apparently that

proposal was not enthusiastically endorsed which explains why we're still here. A milder remedy enrolling lawyers in language classes has been mooted which explains why this book is in your hands. Uncommon Law of Learned Writing 2.0 motivates lawyers to prefer plain language to the legalese and verbosity that have besmirched legal writing for centuries. This book is as sweeping and authoritative a treatment of its subject as you can find anywhere. *Manual of Electrical Undertakings*, 1927

*Soil Degradation and Restoration in Africa* Rattan Lal, B. A. Stewart, 2019-07-09 Soil degradation is a widespread problem in Africa resulting in decreased agricultural productivity while demand for food continues to increase. Degradation is caused by accelerated erosion, acidification, contamination, depletion of soil organic matter and plant nutrients, and salinization. The major cause of soil degradation in Africa is uncontrolled and excessive grazing in the savanna regions followed by deforestation and the use of inappropriate and extractive farming practices. Perpetual neglect of the health of soils in Africa can exacerbate the already serious problems of food and nutritional insecurity and environmental degradation. Food and nutritional security of the growing population of Africa can only be achieved if degraded soils are restored and soils of agroecosystems are managed prudently and sustainably. Ignoring soils and taking the fragile finite and precious soil resources for granted is the principal cause of poverty, hunger, and environmental degradation. The downward spiral must be reversed through soil restoration measures based on translating science into action. This book describes the soils of Africa, processes of soil degradation, extent and severity of soil degradation, and the impacts of degradation processes on food and nutritional security. Features: Explores the extent and severity of soil degradation in Africa; Analyzes the cause-effect relationship between anthropogenic activities and soil degradation; Reviews processes of soil degradation in Africa including erosion, salinization, nutrient depletion, and decline of soil organic matter; Addresses the effect of climate change on soil degradation in Africa; Explains how soil degradation causes food and nutritional insecurity. Part of the *Advances in Soil Sciences* series, this volume is specifically devoted to the processes and factors that cause soil degradation and the challenges and potential for remediation and restoration of soil health in Africa. *Approaches to Language and Culture* Svenja Völkel, Nico Nassenstein, 2022-08-22 This book provides an overview of approaches to language and culture and it outlines the broad interdisciplinary field of anthropological linguistics and linguistic anthropology. It identifies current and future directions of research including language socialization, language reclamation, speech styles and genres, language ideology, verbal taboo, social indexicality, emotion, time, and many more. Furthermore, it offers areal perspectives on the study of language in cultural contexts, namely Africa, the Americas, Australia and Oceania, Mainland Southeast Asia, and Europe, and it lays the foundation for future developments within the field. In this way, the book bridges the disciplines of cultural anthropology and linguistics and paves the way for the new book series *Anthropological Linguistics*.

**Plant Engineer's Manual**, 1929 *Illustrated Congressional Manual*, 1896 **Climate Smart Agriculture** Food and Agriculture Organization of the United Nations, 2018-06-12 The book expands and formalizes the conceptual foundations of Climate

Smart Agriculture drawing upon theory and concepts from agricultural development institutional and resource economics The book uses economic lens to identify the main features of CSA its likely impact and the challenges associated with its implementation It is a product of the EPIC team in the ESA division and contributes to SO2 OO2 Climate Smart Agriculture CSA is a concept that calls for integration of the need for adaptation and the possibility of mitigation in agricultural growth strategies to support food security Several countries around the world have expressed intent to adopt CSA approach to managing their agricultural sectors However there is considerable confusion about what the CSA concept and approach actually involve and wide variation in how the term is used It is critical to build a more formal basis for the CSA concept and methodology and at the same time providing illustrations of how the concept can be applied across a range of conditions
