Promoting sustainable local economic development initiatives Marius Venter, 2022 This book endeavours to outline case studies that promote sustainable Local Economic Development LED initiatives It is generally believed that local governments are the foot soldiers of LED However this seems to be a myth as local governments in South Africa and elsewhere have not yet fulfilled this mandate and have been struggling for several years to implement LED initiatives The distinctive merit of this book lies in the way it combines the South African context with the wider international development context in ways that there is a flow of information and ideas both ways The book is an essential part of this sequence of ideas development and action at a critical time for strategic action directed at a sustainable future It showcases case studies and responses to the impacts of globalisation as a bridge between urban rural and institutional action and reveals avenues for local government leadership in communities research student engagement and wider interactions **Effects of**

education being availed to an increasingly diverse populace Learner Performance in South Africa Charles Edward Wickens Simkins, Andrew Paterson, 2005 South Africa has done well to systematically expand its educational system and to lengthen the schooling experience of successive learner cohorts But the quality of the output from the school system has been questioned In seeking to identify the reasons for this it is important to relate educational outputs competencies as measured for instance by examinations or standardized tests to inputs Determining the relative contributions of the inputs of the school the household and the individual learner to educational outputs is not straightforward particularly since very little educational production function analysis has been undertaken in South Africa Until recently no South African school data has incorporated test results school characteristics and information on the household circumstances of individual learners necessary for this kind of analysis However the results from a survey of a sample of schools involved in the large scale Quality Learning Project QLP funded by the Business Trust have yielded such data The QLP data set offers a new analytical opportunity to address the question What are the effects of social and economic variables on educational outcomes in the QLP schools **Linguistic Atlas of South Africa** Izak J.
