Born in Chains Clinton Chauke, 2018-05-15 What is it like to be born dirt poor in South Africa Clinton Chauke knows having been raised alongside his two sisters in a remote village bordering the Kruger National Park and a squatter camp outside Pretoria Clinton is a young village boy when awareness dawns of how poor his family really is there s no theft in the village because there s absolutely nothing to steal But fire destroys the family hut and they decide to move back to the city There he is forced to confront the rough and tumble of urban life as a bumpkin He is Venda whereas most of his classmates speak Zulu or Tswana and he has to face their ridicule while trying to pick up two or more languages as fast as possible With great self awareness Clinton negotiates the pitfalls and lifelines of a young life crime and drugs football religion friendship school circumcision and ultimately becoming a man Throughout it all he displays determination as well as a self deprecating humour that will keep you turning the pages till the end Clinton s story is one that will give you hope that even in a sea of poverty there are those that refuse to give up and ultimately succeed

Polymer Nanocomposites for Advanced Engineering and Military Applications Ramdani, Nouredine, 2019-04-01 The field of polymer nanocomposites has become essential for engineering and military industries over the last few decades as it applies to computing sensors biomedical microelectronics hard coating and many other domains Due to their outstanding mechanical and thermal features polymer nanocomposite materials have recently been developed and now have a wide range of applications Polymer Nanocomposites for Advanced Engineering and Military Applications provides emerging research on recent advances in the fabrication methods properties and applications of various nano fillers including surface modification methods and chemical functionalization Featuring coverage on a broad range of topics such as barrier properties biomedical microelectronics and matrix processing this book is ideally designed for engineers industrialists chemists government officials military professionals practitioners academicians researchers and students

Drum, 2007 [Research Anthology on Military and Defense Applications, Utilization, Education, and Ethics](#) Management Association, Information Resources, 2021-05-28 Military technology is highly advanced in terms of technology being used in the field computer applications artificial intelligence and software applications These high performance technologies range from weapons to communications technology to automation in vehicles and weaponry These technologies must be both secure and reliable in harsh environments Research is being focused specifically on that including how military and defense applications operate what modern technologies are being used and the ethics surrounding these applications A holistic view of these applications is necessary for both understanding current military tactics and tools along with the future applications The Research Anthology on Military and Defense Applications Utilization Education and Ethics focuses specifically on military and defense operations expenditure technologies and tools and the ethics surrounding technologies like weaponry and artificial intelligence in the military The chapters cover a wide and diverse range of military and defense applications while providing crucial information on the

functions security and reliability of these technologies Beyond an understanding of the applications themselves this book also focuses on military education surrounding these technologies and the ethics of usage to provide a well rounded understanding of research in the field This book is ideal for military consultants military personnel defense agencies national security agencies government officials defense personnel policymakers military educators and trainers stakeholders practitioners researchers academicians and students interested in the latest research in military and defense applications

Chitin- and Chitosan-Based Biocomposites for Food Packaging Applications Jissy Jacob, Sravanthi Loganathan, Sabu Thomas, 2020-03-06 Chitin is one of the most important biopolymers synthesized by an enormous number of living organisms and is a promising bioactive polymer for food packaging applications due to its functional properties This book focuses on composition properties characterization and theoretical approach of chitin and chitosan bio composites It describes the most recent studies concerning chitin and chitosan based films and gives an overview about future trends regarding the industrial applications of chitin and chitosan for food packaging purposes This book is especially useful for researchers in the fields of bionanocomposites especially those with an interest in packaging applications

Laser and Plasma Applications in Materials Science El Hachemi Amara, Djamila Bennaceur-Doumaz, 2011-04-19 Selected peer reviewed papers from the LAPAMS 2010 Algiers from 27th to 30th November 2010

Surface Engineering Techniques and Applications: Research Advancements Santo, Loredana, Davim, J. Paulo, 2014-02-28 Surface engineering includes many facets of materials science that help regulate the function quality and safety of products such as automotive textile and electronic materials New technologies are developing to help enhance the surface performance Surface Engineering Techniques and Applications Research Advancements provides recent developments in surface engineering techniques and applications It details scientific and technological results while also giving insight to current research economic impact and environmental concerns so that academics practitioners and professionals in the field as well as students studying these areas can deepen their understanding of new surface processes

Pattern Recognition for Reliability Assessment of Water Distribution Networks N. Trifunovic, 2012-02-13 This study investigates the patterns that describe reliability of water distribution networks focusing to the node connectivity energy balance and economics of construction operation and maintenance A number of measures to evaluate the network resilience has been developed and assessed to arrive at more accurate diagnostics of regular and irregular demand scenarios These measures have been proposed as a part of the methodology for snap shot assessment of network reliability based on its configuration and hydraulic performance Practical outcome of the research is the decision support tool for reliability based design of water distribution networks This computer package named NEDRA Network Design and Reliability Assessment consists of the modules for network generation filtering initialisation optimisation diagnostics and cost calculation which can be used for sensitivity analyses of single network layout or assessments of multiple layouts The study concludes that none of the analysed aspects develops clear singular patterns

Nevertheless the proposed network buffer index NBI and the hydraulic reliability diagram HRD as visual representation of the network resilience give sufficient snap shot pointing the composition of the index value and displaying possible weak points in the network that can be hidden behind the averaged values of various reliability measures *Polymers and Two-Dimensional Nanocomposites* Rotimi Sadiku, Yskandar Hamam, Suprakas Sinha Ray, Oladipo Folorunso, 2024-11-23 *Polymers and Two Dimensional Nanocomposites* provides a detailed review of recent progress in this important research field The chapters cover new developments in synthesis methods fabrication techniques sample preparation methods surface modification characterization methods of enhancing the properties of these materials and industrial applications in energy environmental oil and gas sensors corrosion biomedical and structural applications The book provides a valuable reference resource for academic and industrial researchers materials scientists and engineers working in the fields of polymer science and engineering polymer composites and nanocomposites Covers recent developments in synthesis characterization properties and applications Discusses new fabrication techniques and how to select the right processing conditions Systematic presentation of theoretical and experimental investigation of properties for various industrial applications Attention is given to current challenges and future improvements *Proceedings of the International Conference Theory and Applications in the Knowledge Economy* Eduardo Tomé, 2016-07-08 Foreword TAKE 2016 is a dream that came true In about six months a group of friends and colleagues put together in an upcoming and very dynamic university a conference with 9 streams 3 keynotes and 3 special sessions 60 papers presented 6 posters and around 80 participants from 20 countries This is awesome I would like to deeply thank Aveiro University the GOVCOPP research centre the conference committee the keynote speakers the special session convenors the stream leaders the reviewers the authors and the administrative people for all their work and support I want to have two special words one for Blazenka Knezevic without whom the website would not have been possible the other for Gaby Neumann for work in these Proceedings Scientifically TAKE seems to be as important and new and far reaching We don't have shortage of models regarding the knowledge economy but we decisively lack to explore the relation between theory and practice TAKE is a step in exploring that difference We know that Exact sciences find the best answers and social sciences give the best questions J C Spender and we also know that Knowledge Management is more preached by scholars than done by practitioners Aino Kianto We assume the first idea and try to overcome the second Hopefully TAKE 2016 will be a great success Thank you for everything *Biomedical and Environmental Sensing* J. I. Agbinya, E. Biermann, Y. Hamam, 2022-09-01 At a time when the applications of sensors are in high demand and environmental issues are international priorities this book on biomedical and environmental sensing provides the technical basis for researchers and students to understand the requirements for biomedical computing and also environmental sensing and to develop solutions in their areas of interests The book deals with key techniques that need to be understood and also examples of applications of the techniques Biomedical and environmental sensing are helping to extend

the life span of human beings and infrastructures as it has become more and more sensible to understand what is happening for example inside a person an aircraft a road network or a bridge and to provide quick response Several chapters of the book have dealt with the state of the art in biomedical decision support systems in therapeutic medicine A data driven decision support system and a prototype support system for anaesthetics are major enablers for doctors and nurses to provide efficient and timely response not only to diagnose ailments but also to decide on the preferred approach for solving the problems The analyses in the chapters are coherently detailed and easy to comprehend There is a chapter on hypothermia therapy and a hardware probe was also developed and described Classification of chromosomes is a major aid in DNA analysis and recognition This valuable insight into a DNA analysis method is provided Information on heart diseases onset of heart attacks and failure can be detected through reconstructing electrophysiological information about the surface of the heart A reconstruction method is described in this book and provides strong foundation for research and training in this life determining area The remaining chapters on sensing of driver conditions including fatigue peeks into tools and methodologies for understanding both the onset of fatigue and its forms for prevention of accidents in vehicles The rest of the book gives techniques for planning biomedical and environmental sensor networks and their security The book will no doubt greatly serve the needs of health professionals researchers in the health and environmental industry and policy makers

From an Ethic of Sufficiency to its Policy and Practice in Late Capitalism Manu V. Mathai, Sylvia Lorek, Wolfgang Sachs, 2023-12-13 That the notion of sufficiency is essential for a good life is an idea that enjoys support across many ethical philosophical religious and cultural persuasions This notion reasserted itself in the study of sustainability once modern society reluctantly took cognizance of the limited low entropy energy and matter available for human appropriation There is today therefore a general recognition of i e not necessarily wide agreement on the merits of or needs for notions of sufficiency as a species of environmentalism within secular communities In this context a critical question that invites our attention is how to effect sufficiency and in particular of dealing with the daunting challenge of injustice as well as questions of distribution within and between countries that it brings to attention Given sufficiency s original home as it were in tradition the modern world has tended to dismiss it or to plead to individual voluntary simplicity when faced with evidence asserting its necessity Sufficiency is also often written away as a spiritual problem The domain of ascetics and the religious How to habilitate sufficiency in a political economy for the secular modern facing its biggest existential challenge yet in the form of the environmental crisis
