Tshwane South College Application For 2015:

Research Methods for Educational Leadership and Management Musundire, Austin, 2025-05-13 Various research methods including action case study and experimental research can be tailored for educational leadership and management. Different research designs, data collection techniques and data analysis methods have differing strengths, weaknesses and challenges. As a result, it is crucial to develop the skills and confidence needed to conduct high quality research. Developing a deeper understanding of how to conduct rigorous research may consequently foster more effective and innovative research leading to improved educational policies, practices and outcomes. *Research Methods for Educational Leadership and Management* illustrates how these methods can be effectively applied to address issues in educational leadership and management. It promotes best practices in educational research by highlighting ethical considerations, addressing common challenges and providing strategies for overcoming these obstacles. Covering topics such as equity, employment practices, high performance culture and professional competencies, this book is an excellent resource for educational leaders, school managers, school administrators, policymakers, researchers, professionals, scholars, academicians and more. *Fees Must Fall* Susan Booysen, 2016-10-01 This book explores the student discontent a year after the start of the 2015 South African FeesMustFall revolt. FeesMustFall, the student revolt that began in October 2015, was an uprising against lack of access to and financial exclusion from higher education in South Africa. More broadly, it radically questioned the socio-political dispensation resulting from the 1994 social pact between big business, the ruling elite and the liberation movement. The 2015 revolt links to national and international youth struggles of the recent past and is informed by black consciousness politics and social movements of the international left. Yet its objectives are more complex than those of earlier struggles. The student movement has challenged the hierarchical top-down leadership system of university management and its double speak of professing to act in workers and students' interests yet entrenching a regressive system for control and governance. University managements, while on one level amenable to change, have also co-opted students into their ranks to create co-responsibility for the highly bureaucratised university financial aid that stands in the way of their social revolution. This book maps the contours of student discontent a year after the start of the FeesMustFall revolt. Student voices dissect colonialism, improper compromises by the founders of democratic South Africa, feminism, worker rights and meaningful education. In-depth assessments by prominent scholars reflect on the complexities of student activism, its impact on national and university governance and offer provocative analyses of the power of the revolt. **ECEL2015-14th European Conference on e-Learning**, Amanda Jefferies and Marija Cubric, 2015-10-13 These Proceedings represent the work of contributors to the 14th European Conference on e-Learning (ECEL 2015) hosted this year by the University of Hertfordshire, Hatfield, UK, on 29-30 October 2015. Callaghan, Gregory John Lee, Nthabiseng V. Moraka, Hester Nienaber, Shaun Ruggunan, Whitey (Tjaart Nicholaas) van der Linde, 2016-12-31 The purpose of this book is to establish the first formalised scholarly work on critical management studies CMS in the South African context The book is a collection of seven chapters six of which employ a conceptual methodology and one of which follows an interpretive paradigm employing qualitative methods of inquiry CMS is a relatively young school of thought arising in the early 1990s and still very much a peripheral movement within the academic discipline of management South Africa has very little scholarship on CMS as precious few scholars work in this space Furthermore publication opportunities are virtually non-existent as CMS is virtually unknown in the South African community of management scholars Thus this book represents the first academic work on CMS published in South Africa written and reviewed by scholars who are familiar with the field The primary target readership would be management academics but it could also be a useful reference for postgraduate students in management **Biological Nitrogen Fixation** Frans J. de

Bruijn, 2015-06-12 Nitrogen is arguably the most important nutrient required by plants However the availability of nitrogen is limited in many soils and although the earth's atmosphere consists of 78.1% nitrogen gas N_2 plants are unable to use this form of nitrogen To compensate modern agriculture has been highly reliant on industrial nitrogen fertilizers to achieve maximum crop productivity However a great deal of fossil fuel is required for the production and delivery of nitrogen fertilizer Moreover carbon dioxide CO_2 which is released during fossil fuel combustion contributes to the greenhouse effect and run-off of nitrate leads to eutrophication of the waterways Biological nitrogen fixation is an alternative to nitrogen fertilizer It is carried out by prokaryotes using an enzyme complex called nitrogenase and results in atmospheric N_2 being reduced into a form of nitrogen diazotrophic organisms and plants are able to use ammonia It is this process and its major players which will be discussed in this book Biological Nitrogen Fixation is a comprehensive two-volume work bringing together both review and original research articles on key topics in nitrogen fixation Chapters across both volumes emphasize molecular techniques and advanced biochemical analysis approaches applicable to various aspects of biological nitrogen fixation Volume 1 explores the chemistry and biochemistry of nitrogenases *nif* gene regulation the taxonomy evolution and genomics of nitrogen fixing organisms as well as their physiology and metabolism Volume 2 covers the symbiotic interaction of nitrogen fixing organisms with their host plants including nodulation and symbiotic nitrogen fixation plant and microbial omics cyanobacteria diazotrophs and non-legumes field studies and inoculum preparation as well as nitrogen fixation and cereals Covering the full breadth of current nitrogen fixation research and expanding it towards future advances in the field Biological Nitrogen Fixation will be a one-stop reference for microbial ecologists and environmental microbiologists as well as plant and agricultural researchers working on crop sustainability **Natural Healing as**

Conflict Resolution Nicholson, Rebecca, 2020-10-16 Traditional methods for addressing conflict and healing have been largely replaced in elite settings by modern approaches Rather than old and new complementing one another bias is present New is widely perceived as better among elite institutions even when research indicates otherwise Within the realm of international development the need for cost effective sustainable and successful methods of healing must be explored Natural Healing as Conflict Resolution is an essential reference book that examines and addresses systemic bias towards natural healing methods and explores the mutually beneficial relationships of natural healing through human and non human life forms in the context of resolving conflict It illustrates not only the more obvious biological physiological benefits of complementary approaches but also the spiritual emotional and psychological benefits of integrating natural means of healing to resolve conflict As such the book acknowledges the effectiveness and articulates the benefits of traditional indigenous healing methods and how they can be used in complementary mutually beneficial ways with modern practices Highlighting emerging topics that include ecopsychology parapsychology and holistic medicine this book is ideal for conflict resolution practitioners psychologists trauma counselors veterans associations pet therapists nature organizations academics scientists eco architects and designers international development policymakers peacebuilding institutions natural and traditional healers alternative integrative medicine practitioners spiritualists researchers and students *Contemporary Mission Theology* Gallagher, Rogert L., Hertig, Paul, 2017-02-16 A resource for the classroom that specifically addresses the missiological issues of the twenty first century this collection in honor of Charles E Van Engen features contributions from practically all the leading lights of the missiology world Scholars including Stephen Bevans Roger Schroeder van Thanh Nguyen Mary Motte Gerald Anderson Scott Sunquist and many others offer their insights and reflections focusing on the impact of cultural and demographic changes on the nature and purpose of Christian mission Publisher **Sustainable Social Housing Development in BRICS+ Countries** Soraya Beukes, Marzieh Asaadi, Pfano Mashau, Marina G. Shilina, Nazreen Shaik-Peremanov, 2025-08-07 This book serves as a comprehensive examination of the challenges and best practices encompassing access to adequate housing in BRICS nations It provides insights into the initiatives that can empower BRICS countries to build resilient inclusive sustainable cities and communities for the future relevant to the UN SDG 11 The book is written in a non technical style in order to be accessible to various actors including non specialists In addition it takes into account perspectives from various stakeholders including governments NGOs academic institutions financial institutions and citizens It consults international frameworks and standards for housing including treaties declarations and conventions on the right to housing With this it also provides solutions to creating sustainable cities to realise SDG11 and thereby dignify communities with adequate housing Understanding the Policymaking Process in Developing Countries William Ascher, 2017-11-16 Understanding the Policymaking Process in Developing Countries provides a uniquely comprehensive and practical framework for development practitioners policymakers activists and students to

diagnose and improve policy processes in developing countries across a wide range of issues Based on the classic policy sciences approach the book offers over 100 diagnostic indicators keyed to identify problems of policy processes policy content bureaucratic behavior stakeholder behavior and national subnational interactions This multi disciplinary framework is applied to a host of policy problems that particularly plague countries experiencing the under development syndrome including aborted programs and projects policy impasses distorted implementation unnecessary harm and conflict and shortsighted initiatives These points are illustrated through cases from Africa Asia and Latin America Based on the developing countries distinctive challenges the book also offers recommendations on improving policy content and institutions to address the typical limitations
