Ttuc January 2015 Teaching Timetable

**University of Illinois at Urbana-
Champaign**

A red circular graphic with a gradient, appearing as a partial circle or a thick arc, located to the right of the University of Illinois at Urbana-Champaign text.

Ttuc January 2015 Teaching Timetable:

Education Policy, Practice and the Professional Jane Bates, Sue Lewis, Andy Pickard, 2019-03-21 In this introduction to educational policy practice and professionalism the authors focus first on providing an historical overview of English policy from the state's first interventions in education through to Thatcherism and the election of the Blair government. Chapters then explore the key contemporary policies of recent times and offer a critique on how they have worked in practice with reference to the hysteria that often surrounds education policy. An important theme is media representation of educational matters and the effects this has on the teaching profession. Commentaries and case studies are presented throughout providing an accessible link to what it was really like to learn, teach and live at the time the policy was in place. This new edition now includes an account of the measures taken by the Coalition Government of 2010-15, examining the Coalition's continuities with the previous administration whilst also exploring departures from previous thinking and practices, updated references and case studies throughout to represent new research and legislation since the first edition, an extended discussion of globalization and global policy, borrowing further coverage of social justice theory including a perspective on identity theory and the role of education in the development of identity and the marginalisation of individuals and groups, a new historical chapter covering the period 1945 to 1997, a summary of the development of the curriculum and a critique of the 2014 National Curriculum as pioneered by Michael Gove and a new conclusion setting out the trajectory of current policies and how this may affect educational practitioners. This is essential reading for all undergraduate students studying education policy and practice.

General Council Report Trades Union Congress, 2003 **Parliamentary Debates (Hansard)**. Great Britain. Parliament. House of Commons, 2013 **The Oxford Handbook of Law, Regulation and Technology** Roger Brownsword, Eloise Scotford, Karen Yeung, 2017-07-24 The variety, pace and power of technological innovations that have emerged in the 21st Century have been breathtaking. These technological developments, which include advances in networked information and communications, biotechnology, neurotechnology, nanotechnology, robotics and environmental engineering technology, have raised a number of vital and complex questions. Although these technologies have the potential to generate positive transformation and help address grand societal challenges, the novelty associated with technological innovation has also been accompanied by anxieties about their risks and destabilizing effects. Is there a potential harm to human health or the environment? What are the ethical implications? Do these innovations erode or antagonize values such as human dignity, privacy, democracy or other norms underpinning existing bodies of law and regulation? These technological developments have therefore spawned a nascent but growing body of law and technology scholarship broadly concerned with exploring the legal, social and ethical dimensions of technological innovation. This handbook collates the many and varied strands of this scholarship, focusing broadly across a range of new and emerging technology and a vast array of social and policy sectors through which leading scholars in the field interrogate the interfaces between law, emerging

technology and regulation Structured in five parts the handbook I establishes the collection of essays within existing scholarship concerned with law and technology as well as regulatory governance II explores the relationship between technology development by focusing on core concepts and values which technological developments implicate III studies the challenges for law in responding to the emergence of new technologies examining how legal norms doctrine and institutions have been shaped challenged and destabilized by technology and even how technologies have been shaped by legal regimes IV provides a critical exploration of the implications of technological innovation examining the ways in which technological innovation has generated challenges for regulators in the governance of technological development and the implications of employing new technologies as an instrument of regulatory governance V explores various interfaces between law regulatory governance and new technologies across a range of key social domains
