## GETTING STARTED

### TITLE PAGE

There is no specific title page format for a term paper in Turabian Style. If you are asked to create a title page, follow the guidelines given by your professor or college. For a general format, consult Kate Turabian's *A Manual for Writers*, 6<sup>th</sup> edition (p. 3).

### FORMAT

Use 12-point Times New Roman font on all pages of the paper. Double space the text, but single space the footnotes and endnotes. Leave a one-inch margin on all four sides of the document (p. 252, 14 2-5).

## FOOTNOTES

### FOOTNOTES

Quotations, paraphrases, and summaries are cited by using either footnotes or endnotes. In the text, the note numbers are superscript, follow the passage being referenced, and come immediately after the final punctuation mark. Corresponding footnotes are placed at the bottom of their page of reference.

The text and footnotes are separated by a short line, and the reference begins with a full-sized number. The first line should be indented. Footnotes continue their numbering throughout the paper rather than by page.

Most word processing programs will automatically track note references once they are added or rearranged (p. 185-213, 11).

### THE HISTORY OF WESTERN MILITARY CODES

In Victorian England, strict parents made it hard for lovers to communicate with each other. "Lovers would have to invent their own ciphers, which they used to publish notes in newspapers."<sup>1</sup> This paper will explore some of the history of codes used by the west's militaries and how they aided in warfare.

Charles Babbage loved to read the paper and try to solve the codes. Once, he saw a message from a student inviting his girlfriend to elope. Babbage wrote in their code and advised them not to act so rashly. Their code had been discovered.<sup>2</sup>

2. Benjamin McDonald, *The Roots of Military Codes* (Madison, N.J.: Fairleigh Dickinson University Press, 1975): 366-68.

1

If it had not been for this secret coding, perhaps the outcome of the second World War would have been dramatically different. Yet because the information revealed was so critical, the cryptanalysts literally saved the day.<sup>3</sup>

The ability to decipher the code of the enemy enabled the allies to get the upper hand in WWII. American historian Thomas Powers wrote the following:

The American ability to read Japanese cables, code-named Magic, was one of the small advantages that helped the Allies win time and then the war. Another was the British ability to read the German military communications enciphered with the Enigma machine, code-named Ultra. (Powers 1977, 22)

Considering Powers' contribution to the development of the coding system within warfare, it is not surprising that each side in the war

### TITLE

The title appears centered on the first page of text in all capital letters. It should be in 12-point font and not italicized, underlined, bolded, or in quotation marks (p. 254, 14 10).

### NUMBERING

The page number is placed at the bottom center of the first page of text. On subsequent pages, the number appears in the upper right-hand corner. Every page is assigned a number even though page numbers do not appear on the title page or other display pages (i.e. tables or charts). However, the table of contents pages are assigned lowercase roman numerals (p. 253 14 6-9).

### BLOCK QUOTATIONS

Block quotations are quotations 3 lines or longer and include at least 2 sentences. They are single spaced and indented 4 spaces from the left. If the block quotation is an entire paragraph from the original text, the 1<sup>st</sup> line should be indented an additional four spaces.

Short block quotations should end with a superscript number leading to an endnote or footnote. Paragraph-long block quotations do not use a superscript number and footnote or endnote; instead, they are followed by parenthetical citations (Author's last name, year, of publication, page number) with the punctuation before the citation (p. 83-85, 5 30-34).
