Turner Report On Banking:

Banking supervision and regulation Great Britain: Parliament: House of Lords: Select Committee on Economic Affairs, 2009-06-02 2007 and 2008 saw the biggest financial crisis since the 1930s Banks looking for better yields from plentiful cheap money made much more use of complex financial instruments without fully understanding the risks to which they were exposing themselves and the financial system Defaults on subprime mortgages underlying some of the instruments shattered confidence and financial markets seized up The framework of regulation and supervision in Britain failed to avoid or mitigate the crisis The tripartite authorities in the United Kingdom Bank of England Financial Services Authority FSA and Treasury failed to maintain financial stability and were found wanting in part because the roles of the three parties were not well enough defined and it was not clear who was in charge Too little attention was paid to macro prudential supervision oversight of the aggregate impact on financial stability of individual banks actions only the Bank of England and the FSA were in a position to assess it The FSA concentrated on its responsibility for conduct of business supervision concerned mainly with consumer protection and did not pay full attention to the solvency and sustainability of individual banks It also had an inadequate understanding of the complexity and limitations of the risk assessment models used by the banks it was supervising The Banking Act 2009 showed the Government had learnt the lesson that special resolution provisions are needed for banks since their failure can threaten the whole financial system The Committee calls on the Government urgently to revisit the tripartite supervisory system in the United Kingdom and it should return responsibility for macro prudential supervision to the Bank of England Other recommendations cover bank capital regulation ratings agencies and bank governance

Banking Crisis Great Britain. Parliament. House of Commons. Treasury Committee, 2009 This report examines remuneration in the City of London as well as the nexus of private actors including non executive directors institutional shareholders auditors and credit rating agencies who failed to act as a check on and balance to senior managers and the executive boards of banks The report concludes that the banking crisis has exposed serious flaws and shortcomings in remuneration practices in the banking sector and in particular within investment banking The Committee is concerned that the FSA's Turner Review downplays the role that remuneration played in causing the banking crisis and questions whether the regulator is attaching sufficient priority to tackling the issue The Committee notes the culture in the City of London which encouraged excessive risk taking Lord Myners assertion that his precept to the RBS Board that there should be no reward for failure did not represent an adequate oversight of the remuneration of outgoing senior bank staff and the report casts doubt on the Treasury's decision to rely on the then RBS Board to handle negotiations with these staff without direct Treasury involvement The financial crisis has exposed serious flaws and shortcomings in the system of non executive oversight of bank executives Three problems are noted the lack of time many non executives commit to their role with many combining a senior full time position with multiple non executive directorships in many instances a lack of expertise and a

lack of diversity The failure of institutional investors effectively to scrutinise and monitor the decision of boards and executive management in the banking sector may reflect the low priority some institutional investors have accorded to governance issues in some cases they may have even encouraged the risk taking that proved the downfall of some banks

Law and Corporate Behaviour Christopher Hodges, 2015-10-22 This book examines the theories and practice of how to control corporate behaviour through legal techniques The principal theories examined are deterrence economic rational acting responsive regulation and the findings of behavioural psychology Leading examples of the various approaches are given in order to illustrate the models private enforcement of law through litigation in the USA public enforcement of competition law by the European Commission and the recent reform of policies on public enforcement of regulatory law in the United Kingdom Noting that behavioural psychology has as yet had only limited application in legal and regulatory theory the book then analyses various European regulatory structures where behavioural techniques can be seen or could be applied Sectors examined include financial services civil aviation pharmaceuticals and workplace health safety Key findings are that enforcement has to focus on identifying the causes of non compliance so as to be able to support improved performance rather than be based on fear motivating complete compliance Systems in which reporting is essential for safety only function with a no blame culture The book concludes by proposing an holistic model for maximising compliance within large organisations combining public regulatory and criminal controls with internal corporate systems and external influences by stakeholders held together by a unified core of ethical principles Hence the book proposes a new theory of ethical regulation This title is included in Bloomsbury Professional's International Arbitration online service

Beyond Bad Apples Michelle Tuveson, Daniel Ralph, Kern Alexander, 2020-05-28 The one bad apple spoiling the whole barrel has become a common metaphor used with reference to risk culture in organisations This inside out perspective begins with the individual as the unit of analysis and follows with inferences to the broader environment Since the Global Financial Crisis GFC of 2008 risk culture for many has become the explanation for shortcomings poor decisions and moral failures in organisations This volume presents an institutional perspective of the forces that shape risk culture and culture more generally in organisations through a multi disciplinary examination from a variety of leading academics and subject specialists The authors demonstrate that firms play a role as manufacturers and managers of risk and they challenge common conceptions that attribute risk to chance circumstances or rogue behaviours The foundational concepts needed for an institutional view of risk culture are highlighted with subsequent links to significant developments within society and firms

Research Handbook on Central Banking Peter Conti-Brown, Rosa Maria Lastra, Central banks occupy a unique space in their national governments and in the global economy The study of central banking however has too often been dominated by an abstract theoretical approach that fails to grasp central banks institutional nuances This comprehensive and insightful Handbook takes a wider angle on central banks and central banking focusing on the institutions of central banking By institutions Peter Conti Brown and Rosa Lastra

refer to the laws traditions norms and rules used to structure central bank organisations The Research Handbook on Central Banking s institutional approach is one of the most interdisciplinary efforts to consider its topic and includes chapters from leading and rising central bankers economists lawyers legal scholars political scientists historians and others **Banking Law** Andreas Kokkinis, Andrea Miglioni, 2021-03-16 Banking regulation and the private law governing the bank customer relationship came under the spotlight as a result of the global financial crisis of 2007 2009 More than a decade later UK EU and international regulatory initiatives have transformed the structure business practices financing models and governance of the banking sector This authoritative text offers an in depth analysis of modern banking law and regulation while providing an assessment of its effectiveness and normative underpinnings Its main focus is on UK law and practice but where necessary it delves into EU law and institutions such as the European Banking Union and supervisory role of the European Central Bank The book also covers the regulation of bank corporate governance and executive remuneration the promises and perils of FinTech and RegTech and the impact of Brexit on UK financial services Although detailed the text remains easy to read and reasonably short pedagogic features such as a glossary of terms and practice questions for each chapter are intended to facilitate learning It is a useful resource for students and scholars of banking law and regulation as well as for regulators and other professionals who are interested in reading a precise and evaluative account of this evolving area of law
