*SATISFACTION INDEX OF THE EMPLOYEES AND PASSENGERS OF INDIAN AIRLINES* Dr Dipamitra, **APP CAB SERVICE QUALITY IN THE CITY OF JOY** Ms. Riya Ghosh, Dr Dipamitra, **Public Transportation Quality of Service** Luigi Dell'Olio, Angel Ibeas, Juan de Ona, Rocio de Ona, 2017-10-11 Public Transportation Quality of Service Factors Models and Applications is the first book to help researchers better understand the contributing factors that can improve public transportation perception among users The book compiles in one place metrics currently dispersed in journal articles government publications and book chapters It critically analyzes currently available modeling methodologies such as the Ordered Logit Probit model and Models of Structural Equations highlighting their advantages and disadvantages The book addresses models of desired quality including the views of users and non users discussing the gap between desired and perceived quality The book also examines data mining approaches such as decision trees and neural networks showing how to involve the public in the decision making process to create policies that encourage public transport demand Measuring passenger s views on public transportation is of critical concern to promote wider transit use in cities around the world Includes insights from both theoretical and practical points of view for both researchers and practitioners Features case studies in each chapter that apply models discussed Helps readers develop and design their own studies for measuring quality of service Shows how to include perceived quality in contracts Provides access to the survey formulas and data to better enable implementation of models **Managing Airports** Anne Graham, 2012-05-16 Approaching management topics from a strategic and commercial perspective rather than from an operational and technical angle Managing Airports second edition provides an innovative insight into the processes behind running a successful airport It contains examples and case studies from airports all over the world to aid understanding of the key topic areas and to place them in a practical context The book tackles the key airport management issues related to economic performance marketing and service provision within the context of the industry s wider development systematically considers the impact that airports have on the surrounding community from both an environmental and economic viewpoint analyses the contemporary trends towards privatization and globalization that are fundamentally changing the nature of the industry Accessible and up to date Managing Airports second edition is ideal for students lecturers and researchers of transport and tourism and practitioners within the air transport industry Airport case studies include those from BAA Vienna Aer Rianta Amsterdam Australia and the USA *Quantitative Problem Solving Methods in the Airline Industry* Cynthia Barnhart, Barry Smith, 2011-12-22 This book reviews Operations Research theory applications and practice in seven major areas of airline planning and operations In each area a team of academic and industry experts provides an overview of the business and technical landscape a view of current best practices a summary of open research questions and suggestions for relevant future research There are several common themes in current airline Operations Research efforts First is a growing focus on the customer in terms of 1 what they want 2

what they are willing to pay for services and 3 how they are impacted by planning marketing and operational decisions

Second as algorithms improve and computing power increases the scope of modeling applications expands often re integrating processes that had been broken into smaller parts in order to solve them in the past Finally there is a growing awareness of the uncertainty in many airline planning and operational processes and decisions Airlines now recognize the need to develop robust solutions that effectively cover many possible outcomes not just the best case blue sky scenario

Individual chapters cover Customer Modeling methodologies including current and emerging applications Airline Planning and Schedule Development with a look at many remaining open research questions Revenue Management including a view of current business and technical landscapes as well as suggested areas for future research Airline Distribution a comprehensive overview of this newly emerging area Crew Management Information Systems including a review of recent algorithmic advances as well as the development of information systems that facilitate the integration of crew management modeling with airline planning and operations Airline Operations with consideration of recent advances and successes in solving the airline operations problem Air Traffic Flow Management including the modeling environment and opportunities for both Air Traffic Flow Management and the airlines
