Michael Hall, 2020-06-09 This comprehensive volume was put together in response to the growing amount of research on tourism in Asia and an increasing number of authors from Asian countries It concentrates on two aspects of Asian Tourism first the Asian tourists themselves and second economic development and tourism in the Asian region The first part of the collection focuses on three areas the motivations of different types of Asian tourist the characteristics and behaviour of particular Asian tourist segments and finally an analysis of specific research issues The second part of the book then goes on to explore the governance and organisation of tourism in the Asian region and the nature of Asian growth and competitiveness as it relates to tourism The articles in this book were originally published in the journal Current Issues in Tourism *Redefining Global Strategy, with a New Preface* Pankaj Ghemawat, 2018-04-10 New Tools for Succeeding Globally Why do so many global strategies fail despite companies powerful brands and other border crossing advantages

Because a one size fits all strategy no longer stands a chance When firms believe in the illusions of a flat world and the death of distance they charge across borders as if the globe were one seamless marketplace But cross border differences are larger than we assume Most economic activity including trade real and financial investment tourism and communication happens locally not internationally In this semiglobalized approach companies can cross borders more profitably by basing their strategies on the geopolitical differences that matter they must identify the barriers their strategies will have to overcome and they must build bridges to cross those barriers Based on rigorous research Pankaj Ghemawat shows how to create successful strategies and provides practical management tools so you can Assess the cultural administrative geographic and economic differences between regions at the industry level and decide which ones require attention Track the implications of the specific border crossing actions that will impact your company s ability to create value the most Generate superior performance through strategies that are optimized for the three A s adaptation adjusting to differences aggregation overcoming differences and arbitrage exploiting differences Using in depth examples Ghemawat reveals how companies such as Cemex Toyota Procter Gamble Tata Consultancy Services IBM and GE Healthcare are adroitly managing cross border differences He also shares examples of other well known companies that have failed at this challenge Crucial for any business competing across borders Redefining Global Strategy will help you make the most of our semiglobalized world
