Organic Chemistry Paula Yurkanis Bruice, 1998

Written by the author this student aid features complete step by step solutions to all exercises in the text an essay on electron pushing formalism etc

Principles of Environmental Chemistry James Girard, 2013

Written for science majors who have completed a general chemistry course

Principles of Environmental Chemistry Third Edition enables students to understand the underlying chemical processes that are operating in the environment while demonstrating how difficult it is to measure these systems

It emphasizes that all living and nonliving parts of our environment are made up of chemicals and that all of the natural processes continuously occurring in the environment involve chemical reactions

With this concept of interdependence students begin to see that without some understanding of chemistry it is impossible to fully understand environmental issues such as ozone depletion global warming air and water pollution and the hazards of radioactivity

The Third Edition includes a new chapter on Green Chemistry as well as numerous updates throughout to address the changes in the field

Key Features

Includes a new chapter on Green Chemistry

A new key term glossary is now included at the end of the text

New feature boxes assess students understanding of chapter material with analytical questions and problems

Includes additional chemical equations throughout the text

A new electronic student study guide and solutions manual is available with the third edition

Instructor s resources include PowerPoint Lecture Outlines answers to end of chapter problems and a testbank

A student companion website includes chapter outlines interactive glossary flashcards and weblinks
