Teaching and Learning Frank K. Lester,2007-02-01 The audience remains much the same as for the 1992 Handbook namely mathematics education researchers and other scholars conducting work in mathematics education This group includes college and university faculty graduate students investigators in research and development centers and staff members at federal state and local agencies that conduct and use research within the discipline of mathematics The intent of the authors of this volume is to provide useful perspectives as well as pertinent information for conducting investigations that are informed by previous work The Handbook should also be a useful textbook for graduate research seminars In addition to the audience mentioned above the present Handbook contains chapters that should be relevant to four other groups teacher educators curriculum developers state and national policy makers and test developers and others involved with assessment Taken as a whole the chapters reflects the mathematics education research community s willingness to accept the challenge of helping the public understand what mathematics education research is all about and what the relevance of their research findings might be for those outside their immediate community **Middle Math** Mary B. Eron,Sidney L.

Rachlin,2015-10-01 Originally published in 2005 This monograph represents the work of many mathematics teacher educators explored the content knowledge and pedagogical knowledge that make up the middle grades learning experience The middle grades remains a unique period of time in students development and as such provides both challenges and

promising opportunities for those who prepare teachers of middle grades mathematics This work is the final product of an exciting NSF supported endeavor that gathered leaders in the field and explored curriculum case studies of program models at several institutions as well as issue papers on such key topics as assessment technology and preparing culturally responsive teachers AMTE hopes this monograph will stimulate discussion and bring attention to this critical period of schooling

Ratio and Proportion David Ben-Chaim,Yaffa Keret,Bat-Sheva Ilany,2012-07-30 Ratio and Proportion Research and Teaching in Mathematics Teachers Education offers its readers an intellectual adventure where they can acquire invaluable tools to turn teaching ratio and proportion to professionals and school children into an enjoyable experience Based on in depth research it presents a deep comprehensive view of the topic focusing on both the mathematical and psychological didactical aspects of teaching it The unique teaching model incorporates both theoretical and practical knowledge allowing instructors to custom design teacher courses according to their specific needs The book reports on hands on experience in the college classes plus teachers experience in the actual classroom setting An important feature is the extensive variety of interesting meaningful authentic activities While these activities are on a level that will engage pre and in service mathematics teachers in training most can also be utilized in upper elementary and middle school classes Accompanying the majority of these activities are detailed remarks explanations and solutions along with creative ideas on how to conduct and expand the learning adventure While primarily written for educators of mathematics teachers this book can be an invaluable source of information for mathematics teachers of elementary and middle school classes pre service teachers and mathematics education researchers

On Evaluating Curricular Effectiveness National Research Council,Division of Behavioral and Social Sciences and Education,Center for Education,Mathematical Sciences Education Board,Committee for a Review of the Evaluation Data on the Effectiveness of NSF-Supported and Commercially Generated Mathematics Curriculum Materials,2004-11-12 This book reviews the evaluation research literature that has accumulated around 19 K 12 mathematics curricula and breaks new ground in framing an ambitious and rigorous approach to curriculum evaluation that has relevance beyond mathematics The committee that produced this book consisted of mathematicians mathematics educators and methodologists who began with the following charge Evaluate the quality of the evaluations of the thirteen National Science Foundation NSF supported and six commercially generated mathematics curriculum materials Determine whether the available data are sufficient for evaluating the efficacy of these materials and if not Develop recommendations about the design of a project that could result in the generation of more reliable and valid data for evaluating such materials The committee collected reviewed and classified almost 700 studies solicited expert testimony during two workshops developed

an evaluation framework established dimensions criteria for three methodologies content analyses comparative studies and case studies drew conclusions on the corpus of studies and made recommendations for future research

Large-Scale Studies in Mathematics Education James A. Middleton, Jinfa Cai, Stephen Hwang, 2015-05-05 In recent years funding agencies like the Institute of Educational Sciences and the National Science Foundation have increasingly emphasized large scale studies with experimental and quasi experimental designs looking for objective truths Educational researchers have recently begun to use large scale studies to understand what really works from developing interventions to validation studies of the intervention and then to efficacy studies and the final scale up for large implementation of an intervention Moreover modeling student learning developmentally taking into account cohort factors issues of socioeconomics local political context and the presence or absence of interventions requires the use of large data sets wherein these variables can be sampled adequately and inferences made Inroads in quantitative methods have been made in the psychometric and sociometric literatures but these methods are not yet common knowledge in the mathematics education community In fact currently there is no volume devoted to discussion of issues related to large scale studies and to report findings from them This volume is unique as it directly discusses methodological issue in large scale studies and reports empirical data from large scale studies
