Security on z/VM Paola Bari, Helio Almeida, Gary Detro, David Druker, Marian Gasparovic, Manfred Gnirss, Jean Francois Jiguet, IBM Redbooks, 2007-12-05. Discussions about server sprawl, rising software costs, going green, or moving data centers to reduce the cost of business are held in many meetings or conference calls in many organizations throughout the world. And many organizations are starting to turn toward System z™ and z VM after such discussions. The virtual machine operating system has over 40 years of experience as a hosting platform for servers from the days of VM SP, VM XA, VM ESA, and especially now with z VM. With the consolidation of servers and conservative estimates that approximately seventy percent of all critical corporate data reside on System z, we find ourselves needing a highly secure environment for the support of this infrastructure. This document was written to assist z VM support and security personnel in providing the enterprise with a safe, secure, and manageable environment. This IBM Redbooks publication provides an overview of security and integrity provided by z VM and the processes for the implementation and configuration of z VM Security Server, z VM LDAP Server, IBM Tivoli Directory Server for z OS, and Linux on System z with

PAM for LDAP authentication Sample scenarios with RACF database sharing between z VM and z OS or through Tivoli Directory Integrator to synchronize LDAP databases are also discussed in this book This book provides information about configuration and usage of Linux on System z with the System z Cryptographic features documenting their hardware and software configuration The Consul zSecure Pro Suite is also part of this document this product helps to control and audit security not only on one system but can be used as a single point of enterprise wide security control This document covers the installation and configuration of this product and detailed information is presented on how z Consul can be used to collect and analyze z VM security data and how it can be helpful in the administration of your audit data
