proof of the pudding is in the eating and this book will show previous horse racing results to back up this bold statement So why is this UK handicap horse racing system so good I come from a computing background and I have a fascination for patterns When I say patterns I mean UK horse racing form patterns These patterns repeat themselves but we cannot just rely on this repeating patterns approach as you cannot make a cake with just flour it would be very boring and not a success I doubt you would have many winners Why I am so excited I have spent so many years modelling these UK horse racing systems and I know what works and what does not This racing system is different and I think it is pure in terms of functionality and application by the prospective punter This UK horse racing system can be applied manually or automatically I ran this manually for a couple of weeks to ensure the broad range of punters or horse racing form students out there could apply this system easily and quickly to a racing post race card What To Expect This system throws up 1 to 2 selections per day at various prices it can also produce multiple selections in a race where I would advise you to split your stakes and back them subject to their odds or decimal odds I often back these selections at higher decimal odds than their implied odds of winning on Betfair You will get some of these bets matched at higher decimal odds on Betfair and this is how you make long term profits I mentioned in a previous book that I backed a horse at decimal odds 100 0 in play when it s implied decimal odds was 12 0 and it won the race Why it is so easy to use This UK horse racing handicap system requires few horse racing form data variables and more importantly very little effort is needed to process this data Now this is important as having too much horse form data to process eventually causes brain fatigue A punter will look at 2 or 3 races and then fatigue sets in and errors are made due to rushing the analysis of each race **UK Longshot Horse Racing System 33/1 125/1**
