☞ NOTE ☞

You must have a Technician Class or higher Amateur Radio Operator's License, and a call sign issued by the FCC, to legally transmit using this transceiver. Transmitting without a license carries heavy penalties.

Thank you for purchasing a RadioShack HTX-420 2-Meter/70 cm Dual Band FM Amateur Transceiver. Your transceiver is compact and rugged, making it easy to carry almost anywhere. The crystal controlled circuitry provides accurate and stable frequency selection, making it an ideal choice for your amateur communications needs.

Electronic Compass — provides two letters to indicate direction (such as SW or NW) and up to three digits to show directional angle (such as 360°, 180°, 90° or 45°). See "Using the Electronic Compass" on page 9.

Full 16-Key DTMF (Dual-Tone Multi Frequency) Keypad — lets you dial and make telephone connections. See "Transmitting a DTMF Code" on page 7.

Programmable Frequency Steps — let you set the frequency increment for tuning or scanning to steps of 5, 6.25, 7.5, 10, 12.5, 15, 20, 25, or 50 kHz. See "Setting the Frequency Step" on page 8.

SAME Weather Alert — uses Specific Area Message Encoding (SAME) digital information to determine and display the level of weather events. See "Using the SAME Alert" on page 8.

INTRODUCTION TO AMATEUR RADIO

Amateur radio is a great hobby that has enriched the lives of millions of people all over the world. Your transceiver is the perfect first radio for anyone entering the exciting world of amateur radio, or as a great additional transceiver for the experienced amateur radio operator. Your transceiver opens a door for you to the world from almost anywhere! All you need is an Amateur Radio Operator's License (Technician Class or higher) issued by the Federal Communications Commission (FCC). If you do not have a license, it is easy to get one, and help from licensed operators is available. Find out if there is a ham radio club in your area. Most clubs welcome newcomers and are glad to help you get your license. Here are a few tips to help you get started.

You can turn on your transceiver and scan the entire band to hear what is going on; **however, do not attempt to transmit until you get your license**. If you transmit without a license, you are in violation of federal law that can lead to severe penalties. Ham operators take the FCC rules very seriously

and want nothing to do with "bootleggers" — their term for people who operate without a license. ☞

If you do not hear anyone talking about a local club as you listen to local transmissions, write to the American Radio Relay League (ARRL) at the following address to find out how to contact a local affiliate. The ARRL is the national organization representing amateur radio in the United States. The league has more than 150,000 members. Most are ham operators, or members in the process of obtaining their license.

Start studying for the license exams. Most people can go from knowing absolutely nothing about amateur radio to passing the Technician written exam in less than a month.

The exams test your knowledge of basic radio regulations and elementary radio theory. Many clubs hold license classes which can be a fun and easy way to learn
