

Tropical rainforests are mainly found in the Earth's hot, sunny tropical zone.

High temperatures make the air very humid (warm and wet) in many parts of the tropics, so it rains - a lot!

Phytochemistry of Australia's Tropical Rainforest Cheryl J. Williams, 2021-12 Rare unique and irreplaceable precious native rainforests occupy a precariously small part of Australia while retaining a remarkable level of both biological and chemical diversity unrivalled by any other

ecosystem Australia's ancient history and traditions are intimately intertwined with the rainforest plants that humans have utilised as both food and medicine. Phytochemistry of Australia's Tropical Rainforest is a record of this history and details how our understanding of these plants has led to the discovery of anaesthetics, analgesics, steroids, antimalarials and more. It provides an insight into the habitat ecology and family associations of hundreds of species and explores their future therapeutic potential alongside phytochemical studies of the ancient plant lineages. Toxicological evaluations of important poisonous plants are also included. Rainforests provide shelter for unique flora and fauna that are counted among the rarest species on Earth, many of which are illustrated in this book. This comprehensive work is an essential reference for phytochemists, ethnobotanists and those with an interest in rainforests and their medicinal and botanical potential.

The Routledge Handbook of Political Ecology Tom Perreault, Gavin Bridge, James McCarthy, 2015-06-12. The Routledge Handbook of Political Ecology presents a comprehensive and authoritative examination of the rapidly growing field of political ecology. Located at the intersection of geography, anthropology, sociology and environmental history, political ecology is one of the most vibrant and conceptually diverse fields of inquiry into nature-society relations within the social sciences. The Handbook serves as an essential guide to this rapidly evolving intellectual landscape. With contributions from over 50 leading authors, the Handbook presents a systematic overview of political ecology's origins, practices and core concerns and aims to advance both ongoing and emerging debates. While there are numerous edited volumes, textbooks and monographs under the heading political ecology, these have tended to be relatively narrow in scope, either as collections of empirically based, mostly case study research on a given theme or broad overviews of the field aimed at undergraduate audiences. The Routledge Handbook of Political Ecology is the first systematic, comprehensive overview of the field. With authors from North and South America, Europe, Australia and elsewhere, the Handbook of Political Ecology provides a state-of-the-art examination of political ecology, addresses ongoing and emerging debates in this rapidly evolving field and charts new agendas for research, policy and activism. The Routledge Handbook of Political Ecology introduces political ecology as an interdisciplinary academic field. By presenting a state-of-the-art examination of the field, it will serve as an invaluable resource for students and scholars. It not only critically reviews the key debates in the field but develops them. The Handbook will serve as an excellent resource for graduate and advanced undergraduate teaching and is a key reference text for geographers, anthropologists, sociologists, environmental historians and others working in and around political ecology.

Ecology of Tropical Rainforests, 1979-85 Jayne T. MacLean, 1985. **Distribution and ecology of vascular plants in a tropical rain forest** J.B. Hall, M.D. Swaine, 2013-04-18. It is a privilege to be asked and a pleasurable duty for me to write the foreword of this book. The conservation and wise utilisation of the humid tropical forests, a unique biome, are matters of great concern and importance to millions living within and around these forests and perhaps less directly to the totality of mankind. These forests provide many essential products and services for mankind. The list is lengthy and need not be repeated here. Suffice it to say that

there are not many aspects of human activity which do not utilise some of these products services or derivatives therefrom Yet it is the view of those most closely associated with the study of these forests that what is known is but a minuscule portion of what there is to know The products and services now utilised are perhaps some infinitesimal part of the full potential All over the tropical world however these forests are being destroyed At first slowly but now surely gathering tempo This is true also of Ghana Tracts offorest land are converted to other uses often ephemeral and not sustained Irreversible changes take place in our environment The gains are shortlived the losses unobtrusively accumulate and stay forever The accelerating rate of deforestation in the face of our relatively scanty knowledge of this biome is indeed a sad reflection of the state of human affairs It is in this setting that one welcomes this book by Messrs J B Hall and M D Swaine

MacArthur's Jungle War Stephen R. Taaffe, 1998 His book tells not only how victory was gained through a combination of technology tactics and army navy cooperation but also how the New Guinea campaign exemplified the strategic differences that plagued the Pacific War since many high ranking officers considered it a diversionary tactic rather than a key offensive
