Redlining Culture Richard Jean So, 2020-12-15 The canon of postwar American fiction has changed over the past few decades to include far more writers of color It would appear that we are making progress recovering marginalized voices and including those who were for far too long ignored However is this celebratory narrative borne out in the data Richard Jean So draws on big data literary history and close readings to offer an unprecedented analysis of racial inequality in American publishing that reveals the persistence of an extreme bias toward white authors In fact a defining feature of the publishing industry is its vast whiteness which has denied nonwhite authors especially black writers the coveted resources of publishing reviews prizes and sales with profound effects on the language form and content of the postwar novel Rather than seeing the postwar period as the era of multiculturalism So argues that we should understand it as the invention of a new form of racial inequality one that continues to shape the arts and literature today Interweaving data analysis of large scale patterns with a consideration of Toni Morrison s career as an editor at Random House and readings of individual works by Octavia Butler Henry Dumas Amy Tan and others So develops a form of criticism that brings together qualitative and quantitative approaches to the study of literature A vital and provocative work for American literary studies critical race studies and the digital humanities Redlining Culture shows the importance of data and computational methods for understanding and challenging racial inequality **Capitalism and Commerce in Imaginative Literature** Edward W. **Becoming John Updike** Laurence W. Mazzeno, 2013 When John Updike died in 2009 tributes from the literary establishment were immediate and fulsome However no one reading reviews of Updike's work in the late 1960s would have predicted that kind of praise for a man who was known then as a brilliant stylist who had nothing to say What changed Why And what is likely to be his legacy These are the questions that *Becoming John Updike* pursues by examining the journalistic and academic response to his writings Several things about Updike's career make a reception study appropriate First he was prolific he began publishing fiction and essays in 1956 published his first book in 1958 and from then on brought out at least one new book each year Second his books were reviewed widely usually in major American newspapers and magazines and often in foreign ones as well Third Updike quickly became a darling of academics the first book about his work was published in 1967 less than a decade after his own first book More than three dozen books and hundreds of articles of academic criticism have been devoted to Updike The present volume will appeal to the continuing interest in Updike's writing among academics and general readers alike Laurence W Mazzeno is President Emeritus of Alvernia University Among other books he has written volumes on Austen Dickens Tennyson and Matthew Arnold for Camden House's *Literary Criticism in Perspective* series
