

Practice Guidelines for Central Venous Access

A Report by the American Society of Anesthesiologists Task Force on Central Venous Access

PRactice Guidelines are systematically developed recommendations that assist the practitioner and patient in making decisions about health care. These recommendations may be adopted, modified, or rejected according to clinical needs and constraints, and are not intended to replace local institutional policies. In addition, Practice Guidelines developed by the American Society of Anesthesiologists (ASA) are not intended as standards or absolute requirements, and their use cannot guarantee any specific outcome. Practice Guidelines are subject to revision as warranted by the evolution of medical knowledge, technology, and practice. They provide basic recommendations that are supported by a synthesis and analysis of the current literature, expert and practitioner opinions, open forum commentary, and clinical feasibility data.

Methodology

A. Definition of Central Venous Access

For these Guidelines, central venous access is defined as placement of a catheter such that the catheter is inserted into a systemic great vessel. The venous great vessels include the superior vena cava, inferior vena cava, brachiocephalic veins,

- What other guideline statements are available on this topic?
 - Several major organizations have produced practice guidelines on central venous access.^{1–11}
- Why was this Guideline developed?
 - The ASA has created this new Practice Guideline to provide updated recommendations on some issues and new recommendations on issues that have not been previously addressed by other guidelines. This was based on a rigorous evaluation of recent scientific literature as well as findings from surveys of expert consultants and randomly selected ASA members.
- How does this statement differ from existing guidelines?
 - The ASA Guidelines differ in areas such as insertion site selection (e.g., upper limb site guidance for catheter placement as opposed to use of routine ultrasound and verification of venous location of the catheter).
- Why does this statement differ from existing guidelines?
 - The ASA Guidelines differ from existing guidelines because it addresses the use of bunched techniques, use of an assistant during catheter placement, and management of arrhythmia.

internal jugular veins, subclavian veins, iliac veins, and common femoral veins.¹² Excluded are catheters that terminate in a systemic artery.

B. Purpose of the Guidelines

The purposes of these Guidelines are to (1) provide guidance regarding placement and management of central venous catheters, (2) reduce infections, mechanical, thrombotic, and other adverse outcomes associated with central venous catheterization, and (3) improve management of arterial trauma or injury arising from central venous catheterization.

C. Scope

These Guidelines apply to patients undergoing elective central venous access procedures performed by anesthesiologists or health care professionals under the direction/supervision of anesthesiologists. The Guidelines do not address (1) clinical indications for placement of central venous catheters, (2) emergency placement of central venous catheters, (3) patients with peripherally inserted central catheters, (4) placement and resolution of a pulmonary artery catheter, (5) insertion of bunched central lines (e.g., percutaneous, percuta-

Professional

Practice in Paramedic, Emergency and Urgent Care Valerie Nixon, 2013-04-17 Professional Practice in Paramedic Emergency and Urgent Care explores a range of contemporary relevant topics fundamental to professional practice. Written for both pre and post registration paramedic students, it is also ideal for existing practitioners looking to develop their CPD skills as well as nursing and other health professionals working in emergency and urgent care settings. Each chapter includes examples, practical exercises and clinical scenarios helping the reader relate theory to practice and develop critical thinking skills. Covers not only acute patient management but also a range of additional topics to provide a holistic approach to out of hospital care. Completion of the material in the book can be used as evidence in professional portfolios as required by the Health and Care Professions Council. Professional Practice in Paramedic Emergency and Urgent Care is a comprehensive theoretical underpinning to professional practice at all levels of paramedic and out of hospital care. Applied Clinical Informatics for Nurses with Navigate Advantage Access Susan Alexander, Heather Carter-Templeton, Karen Frith, 2024-12-23 Nurses need to be aware of the latest information technologies and research available to provide safe patient centered evidence based care. Applied Clinical Informatics for Nurses continues its student centered approach to nursing informatics in a modern new edition full of illustrations, tables, figures and boxes that enhance the reader's experience and assist in comprehension. In the updated Third Edition, the authors emphasize the importance of understanding principles and applications of informatics and apply a context based teaching approach to enhance clinical decision making, promote ethical conduct and improve problem solving skills. The Third Edition features extensive updates on telehealth, mobile health and clinical decision support. It also includes expanded information related to software used for data mining and additional case studies to help illustrate creative informatics projects developed by nurses. With Applied Clinical Informatics for Nurses Third Edition, students will develop a deeper understanding of how clinical data can be made useful in healthcare and nursing practice.
