Responsible Innovation in Large Technological Systems J. Roland Ortt,David van Putten,Linda M. Kamp,Ibo van de Poel,2020-03-04 Large technological systems such as seaports nuclear power stations wind farms and natural gas extraction provide vital functions for society And yet these large technological systems have an impact on different stakeholder groups

in both positive and negative ways This book defines responsible innovation and describes how both the innovation process and the resulting innovation outcome can be designed created and implemented in a way that respects the various stakeholder groups involved and affected by the system Taking a case based approach a number of large technological systems are profiled including hydraulic engineering nuclear energy smart metering and wind power The values of each of the stakeholder groups and the costs and benefits of the systems presented are analysed The book concludes by combining these insights to provide a framework for how responsible innovation of large technological systems can be implemented in practice The book will be of particular interest to undergraduate and postgraduate students and researchers in technology and innovation management and corporate governance CSR and business ethics

Radiation-induced effects and the immune system Gabriele Multhoff, Alan G. Pockley, Udo S. Gaipf, Franz Rödel, Numerous developments in molecular biology have led to an explosive growth in the knowledge underlying mechanisms of carcinogenesis cell signalling tumor progression and development of metastasis However cure of cancer is still hampered by the inherited capacity of tumors to become resistant to standard therapies to metastasize from their initial location and to proliferate in other tissue compartments Radiotherapy is one of the main treatment modalities to achieve locoregional tumor control However the treatment of distant metastases further remains to be a challenge In this special topic we are interested to elucidate immunological aspects which are initiated and affected by radiotherapy We also aim to describe the development of innovative immunological strategies from a preclinical stage to clinical application which could be combined with standard radiotherapeutic approaches A special interest will also deal with the effects of radiotherapy on tumor initiating cells as well as on the tumor microenvironment Last but not least the effects of different irradiation sources and qualities such as photons protons and heavy ions will be analyzed with respect to immunological outcome
