Durand, 2007-05-31 Companies and work have undergone significant change and a new productive model has emerged This book shows how the model works showing its high degree of coherence in terms of the integration of functions within companies This book creates a new and challenging theory of services rooted in the concrete experience of workshops and offices Reinventing Work in Europe Dominique Méda, Patricia Vendramin, 2016-12-19 This book looks at the history of

work and the meanings that are attached to it over time Taking as its basis a number of international surveys and interviews

conducted in Europe the authors consider the significance of work for Europeans today Over the years the meaning of work has changed It has become more highly diversified and it is today invested with high expectations that conflict with organisational developments and the changing nature of the labour market The authors use a generational perspective to explore whether it is possible to reconcile the contemporary ethos of work especially with regards to women and young people with organisations that are increasingly under pressure to be profitable and productive Reinventing Work in Europe will be of interest to scholars and students in the areas of sociology of work employment and organizations labour studies digital economy and political economy

Wasted Lives Zygmunt Bauman, 2013-04-26 The production of human waste or more precisely wasted lives the superfluous populations of migrants refugees and other outcasts is an inevitable outcome of modernization It is an unavoidable side effect of economic progress and the quest for order which is characteristic of modernity As long as large parts of the world remained wholly or partly unaffected by modernization they were treated by modernizing societies as lands that were able to absorb the excess of population in the developed countries Global solutions were sought and temporarily found to locally produced overpopulation problems But as modernization has reached the furthest lands of the planet redundant population is produced everywhere and all localities have to bear the consequences of modernity's global triumph They are now confronted with the need to seek in vain it seems local solutions to globally produced problems The global spread of the modernity has given rise to growing quantities of human beings who are deprived of adequate means of survival but the planet is fast running out of places to put them Hence the new anxieties about immigrants and asylum seekers and the growing role played by diffuse security fears on the contemporary political agenda With characteristic brilliance this new book by Zygmunt Bauman unravels the impact of this transformation on our contemporary culture and politics and shows that the problem of coping with human waste provides a key for understanding some otherwise baffling features of our shared life from the strategies of global domination to the most intimate aspects of human relationships
