Feeding Ecology in Apes and Other Primates Gottfried Hohmann, Martha M. Robbins, Christophe Boesch, 2006-10-19 Publisher Description *The Evolution of Thought* Anne E. Russon, David R. Begun, 2007-07-23 Research on the evolution of higher intelligence rarely combines data from fields as diverse as paleontology and psychology. In this volume, we seek to do just that: synthesizing the approaches of hominoid cognition, psychology, language studies, ecology, evolution, paleoecology, and systematics toward an understanding of great ape intelligence. Leading scholars from all these fields have been asked to evaluate the manner in which each of their topics of research inform our understanding of the evolution of intelligence in great apes and humans. The ideas thus assembled represent a comprehensive survey of the various causes and consequences of cognitive evolution in great apes. *The Evolution of Thought* will therefore be an essential reference for graduate students and researchers in evolutionary psychology, paleoanthropology, and primatology.

The Cambridge Handbook of Intelligence Robert J. Sternberg, 2020-01-16 Written by the foremost experts in human intelligence, it not only includes traditional topics such as the nature, measurement, and development of intelligence but also contemporary research into intelligence and video games, collective intelligence, emotional intelligence, and leadership intelligence. In an area of study that has been fraught with ideological differences, this Handbook provides scientifically balanced and objective chapters covering a wide range of topics. It does not shy away from material that historically has been emotionally charged and sometimes covered in biased ways, such as intellectual disability, race, and intelligence culture, and intelligence testing. The overview provided by this two-volume set leaves virtually no area of intelligence research uncovered, making it an ideal resource for undergraduates, graduate students, and professionals looking for a refresher or a summary of the new developments.
