Shenkman, 2016-01-05 Why when it comes to politics do we often seem so gullible and uninformed In *Political Animals* the bestselling historian and journalist Rick Shenkman reveals the hidden biases at work in all of us when we enter the voting booth Drawing on cutting edge research in neuroscience evolutionary psychology and behavioral psychology he explains that evolution has left us with a brain wired for the Stone Age While these ancient instincts often work to our advantage in our personal lives in politics they usually don't Modern cues set off ancient instinctive responses that prompt us to behave in ways contrary to the good governance of our nation Shenkman illuminates not only the curious habits of the American voter today but also the ways in which voter biases have shaped American political history from the shark attacks that got Woodrow Wilson elected to the people who still defend Richard Nixon against the Watergate charges In so doing Shenkman probes the

depths of the human mind to reveal what we must do to fix our floundering democracy *It's Only a Bubble* Dr. Andreas Zachariou, 2015-02 *It's Only a Bubble* aims at the liberation of man from his conviction that he suffers because he is inherently sinful. The traditional religious idea that man fell from the state of perfection that he was made by God is replaced by the idea that man was made perfect in the core field but he was simultaneously placed in the dimensions for gaining perfection also by free choice. Man moves up the dimensions by evolving which is achieved by growing over obstacles. Obstacles are not punishments by God but stimulation for growth. God does not interfere directly because He wants man to act so that he can grow. Help is not offered as a result of faith or prayers but is embedded in the creation and is released automatically as one grows. The author walks the readers through the process of facing obstacles including overwhelming events like death. He also identifies the benefits of moving up the steps of spiritual evolution and describes how formal education can become meaningful if it's finally made an integral part of growth.
