Power Machines N5 November 2011:

Fueling Freedom Stephen Moore, Kathleen Hartnett White, 2016-05-23 Fossil fuel energy is the lifeblood of the modern world. Before the Industrial Revolution, humanity depended on burning wood and candle wax. But with the ability to harness the energy in oil and other fossil fuels, quality of life and capacity for progress increased exponentially. Thanks to incredible innovations in the energy industry, fossil fuels are as promising, safe, and clean an energy resource as has ever existed in history. Yet highly politicized climate policies are pushing a grand scale shift to unreliable, impractical, incredibly expensive, and far less efficient energy sources. Today, fossil fuel has become such a dirty word that even fossil fuel companies feel compelled to apologize for their products. In *Fueling Freedom*, energy experts Stephen Moore and Kathleen Hartnett White make an unapologetic case for fossil fuels, turning around progressives' protestations to prove that if fossil fuel energy is supplanted by green alternatives for political reasons, humanity will take a giant step backwards and the planet will be less safe, less clean, and less free.

Digital Technology for Humans Robert Hanna, 2025-06-02 Digital ethics and AI ethics are of fundamental importance for humankind and its future. Hanna shows how specifically Kantian moral principles can be applied to the design, production, and implementation of digital technology, with a special focus on how these principles flow from the concept and fact of human dignity. His core thesis is that digital technology is nothing more and nothing less than a tool created by humankind for the betterment of humankind, whose use should be constrained by Kantian moral principles grounded in human dignity. This thesis promises to stimulate new research on Kantian approaches to digital ethics and AI ethics. It also has important political implications, including a clarion call for us to engage in the self-conscious, self-disciplined, and free exercise of our own innate cognitive, affective, and practical capacities in the face of new and exceptionally powerful forms of digital technology, e.g., chatbots that threaten to undermine our ability to think, feel, and act for ourselves.

Investigating Family, Food, and Housing Themes in Social Studies Cynthia Williams Resor, 2017-10-08 *Investigating Family, Food, and Housing Themes in Social Studies* asks students to critically examine their own culture by contrasting it with the daily lives of average people in the past. What people ate, where people lived, and the functions of families are examined and contrasted to subjective cultural ideals prescribing what families' food and housing ought to have been. The relationship between housing, food, and family, and social class, status, and gender are emphasized. Each chapter includes essential questions to focus student inquiry, historical overviews focused on changes in family, food, and housing from the pre-industrial era through its transformation during the Industrial Revolution and into the twentieth century, learning activities, and primary source documents and images. This unique approach to teaching history and social studies supports thematic instruction, culturally responsive teaching, place-based education, and literacy in the elementary, middle, or secondary classrooms.

Distinguished Figures in Mechanism and Machine Science Marco Ceccarelli, Alessandro Gasparetto, 2022-12-02

This book discusses the technological developments achieved by distinguished figures in the history of mechanism and machine science MMS This is the fifth volume of a series of books which gathered contributions on the leading scientists in the field This book focuses specifically on the IFToMM community and its activities over the last 50 years showcases who is who in MMS and emphasizes together with the previous books of the series the significance of MMS through time Each chapter recognizes persons whose scientific work resulted in relevant technical developments in the historical evolution of MMS within IFToMM Biographical notes describing the efforts and achievements of these persons are included as well but a technical survey is the core of each chapter offering a modern interpretation of their legacy

Reframing Technology

Kent Hufford, 2024-07-22 For over a hundred years technological change has been framed using a simple narrative technology drives history Reframing Technology challenges this idea of technological determinism through metahistorical and literary analyses that locate the birth of contingent frameworks in the historiography of technology in and around the 1930s The book also traces how the formal discipline of the History of Technology was remarkably preconfigured by four North American authors who were not professional historians Thorstein Veblen Stuart Chase Lewis Mumford and Marshall McLuhan They are considered as a continuum and are put in dialogue despite their training in different disciplines Their work is then linked up with the emergence of formal and institutional inquiry into narratives of technology at the end of the twentieth century The ideas in the book are applied to current discussions about the future of technology and artificial intelligence The book's main argument is that as the authors listed above suggest we need to think beyond the machine and reframe technology as a cultural practice rather than thinking of it as an object or a tool

Is the Universe a Hologram?

Adolfo Plasencia, 2017-05-04 Questions about the physical world the mind and technology in conversations that reveal a rich seam of interacting ideas Science today is more a process of collaboration than moments of individual eureka's This book recreates that kind of synergy by offering a series of interconnected dialogues with leading scientists who are asked to reflect on key questions and concepts about the physical world technology and the mind These thinkers offer both specific

observations and broader comments about the intellectual traditions that inform these questions doing so they reveal a rich seam of interacting ideas The persistent paradox of our era is that in a world of unprecedented access to information many of the most important questions remain unsolved These conversations conducted by a veteran science writer Adolfo Plasencia reflect this with scientists addressing such issues as intelligence consciousness global warming energy technology matter the possibility of another earth changing the past and even the philosophical curveball is the universe a hologram The dialogues discuss such fascinating aspects of the physical world as the function of the quantum bit the primordial cosmology of the universe and the wisdom of hewn stones They offer optimistic but reasoned views of technology considering convergence culture algorithms Beauty Truth the hacker ethic AI and other topics And they offer perspectives from a range of disciplines on intelligence discussing subjects that include the neurophysiology of the brain affective computing collaborative innovation and the wisdom of crowds Conversations with Hal Abelson Ricardo Baeza Yates John Perry Barlow Javier Benedicto Jos Bernab u Michail Bletsas Jose M Carmena David Casacuberta Yung Ho Chang Ignacio Cirac Gianluigi Colalucci Avelino Corma Bernardo Cuenca Grau Javier Echeverria Jos Hernandez Orallo Hiroshi Ishii Pablo Jarillo Herrero Henry Jenkins Anne Margulies Mario J Molina Tim O Reilly John Ochsendorf Paul Osterman Alvaro Pascual Leone Rosalind W Picard Howard Rheingold Alejandro W Rodriguez Israel Ruiz Sara Seager Richard Stallman Antonio Torralba Bebo White Jos Mar a Yturalde

Scientific and Technical Aerospace Reports ,1966 **Last Man Standing** Jack Straw,2012-09-27 As a small boy in Epping Forest Jack Straw could never have imagined that one day he would become Britain s Lord Chancellor As one of five children of divorced parents he was bright enough to get a scholarship to a direct grant school but spent his holidays as a plumbers mate for his uncles to bring in some much needed extra income Yet he spent 13 years and 11 days in government including long and influential spells as Home Secretary and Foreign Secretary This is the story of how he got there His memoirs offer a unique insight into the complex sometimes self serving but always fascinating world of British politics and reveals the toll that high office takes but more importantly the enormous satisfaction and extraordinary privilege of serving both your constituents and your country Straw s has been a very public life but he reveals the private face too and offers readers a vivid and authoritative insight into the Blair Brown era and indeed the last forty years of British politics
