JSL Vol 24-N6 JOURNAL OF SCHOOL LEADERSHIP, 2014-12-23 The Journal of School Leadership is broadening the conversation about schools and leadership and is currently accepting manuscripts We welcome manuscripts based on cutting edge research from a wide variety of theoretical perspectives and methodological orientations The editorial team is particularly interested in working with international authors authors from traditionally marginalized populations and in work that is relevant to practitioners around the world Growing numbers of educators and professors look to the six bimonthly issues to deal with problems directly related to contemporary school leadership practice teach courses on school leadership and policy use as a quality reference in writing articles about school leadership and improvement *Chemical Energy from Natural and Synthetic Gas* Yatish T. Shah, 2017-03-16 Commercial development of energy from renewables and nuclear is critical to long term industry and environmental goals However it will take time for them to economically compete with existing fossil fuel energy resources and their infrastructures Gas fuels play an important role during and beyond this transition away from fossil fuel dominance to a balanced approach to fossil nuclear and renewable energies Chemical Energy from Natural and Synthetic Gas illustrates this point by examining the many roles of natural and synthetic gas in the energy and fuel industry addressing it as both a transition and end game fuel The book describes various types of gaseous fuels and how they are recovered purified and converted to liquid fuels and electricity generation and used for other static and mobile applications It emphasizes methane syngas and hydrogen as fuels although other volatile hydrocarbons are considered It also covers storage and transportation infrastructure for natural gas and hydrogen and methods and processes for cleaning and reforming synthetic gas The book also deals applications such as the use of natural gas in power production in power plants engines turbines and vehicle needs Presents a unified and collective look at gas in the energy and fuel industry addressing it as both a transition and end game fuel Emphasizes methane syngas and hydrogen as fuels Covers gas storage and transport infrastructure Discusses thermal gasification gas reforming processing purification and upgrading Describes biogas and bio hydrogen production Deals with the use of natural gas in power production in power plants engines turbines and vehicle needs Geodynamics and Earth Tides Observations from Global to Micro Scale Carla Braitenberg, Giuliana Rossi, Geodynamics and Earth Tides Editor group, 2018-08-23 This volume treats the key aspects that must be known when dealing with continuous space geodetic or terrestrial geodetic observations The signals of Earth core resonance are discussed as well as tidal effects on Earth polar motion and on earthquake triggering Hydrologic loading be it ocean tides or subsurface water flows is discussed These signals compete with crustal deformation observations of earthquakes e g Gorkha 2015 during interseismic periods and on volcanoes Elbrus Caucasus The instrumentation that is covered includes superconducting gravimeters continuous seafloor gravimeters interferometric tilt and strain meters and GNSS networks The articles give an up to date account of research in which the Earth tides are a benchmark signal for the

sophisticated instrumentation mounted on satellites or the surface observing time variable signals of an evolving Earth Scientists studying the earthquake cycle and geodetic monitoring will find useful material For students in the geosciences the collection offers a good overview of the broad spectrum of topics related to the Earth geodetic monitoring **Comedy and Social Science** Cate Watson,2015-06-12 While there have been many sociological and psychological studies of humor few can claim to be funny Humor may be regarded as a legitimate topic for social scientists but in general they present their research rather seriously In academia humor tends to be trivialized and dismissed This is more than just a missed opportunity for otherwise fun loving academics In literature it is readily accepted that comedy is integral to the human condition To ignore humor is to reject a potentially insightful methodological approach as the humorous worldview presents unique opportunities for investigating the social This book constitutes a unique resource presenting chapters on irony satire and parody as tools for analysis and means of representation as well as considering humor in the conduct of research and offering guidance on getting published Through presenting examples from across the social sciences the book seeks to persuade and inspire rather than to prescribe an approach a closure which would ironically be inimical to the multiplicity and ambiguity which characterizes humorous research and lends it its distinctive edge *The Report: Nigeria 2015* Oxford Business Group,2015-05-05 Despite concerns linked to short term and cyclical risks including unequal development policy uncertainty declining oil prices and localised unrest the longer term growth fundamentals are clear Following the presidential elections in March 2015 the newly elected government of President Muhammadu Buhari will face a host of challenges ranging from high levels of rural poverty to concerns over governance and an insurgency in the north The outcome of the presidential elections gave Nigeria its first peaceful handover of power in more than 16 years as well as a boost of momentum that along with its economic fundamentals places it on the cusp of potentially long term broad based growth *Geopolitics and Decolonization* Fernanda Frizzo Bragato,Lewis R. Gordon,2017-12-06 Gathering researchers from or towards Global South epistemologies this book enriches the debate on crucial questions for liberation in the South and the improvement of South relations It argues that coloniality and colonialism are not outdated phenomena of the historical past but contemporary marks that remain repressed The dominance of Eurocentric paradigm in the social sciences explains the long lasting detachment between thinkers and politicians from the Global South which have been historically presented according to their respective relations with the West Europe and North America The dialogue on common problems and challenges to people and societies in the South largely derived from their colonial past and condition is still sparing This book actively promotes and demonstrates the value of intercultural dialogue and debate amongst voices from within the Global South on issues to do with decoloniality cultural rights law and politics **The Age of Agile** Stephen Denning,2018-02-08 An unstoppable business revolution is under way and it is Agile Sparking dramatic improvements in quality innovation and speed to market the Agile movement has helped companies learn to connect everyone and everything all the time With

rapidly evolving consumer needs and technology that is being updated quicker than ever before businesses are recognizing how essential it is to adapt quickly The Agile movement enables a team unit or enterprise to nimbly acclimate and upgrade products and services to meet these constantly changing needs Filled with examples from every sector The Age of Agile helps you Master the three laws of Agile Management team customer network Embrace the new mindset Overcome constraints Employ meaningful metrics Make the entire organization Agile Companies don't need to be born Agile With the groundbreaking formulas laid out in The Age of Agile even global giants can learn to act entrepreneurially Your company's future may depend on it **Large and Dangerous Rocket Ships** Mark Canepa, 2019-09-17 There's no available

information at this time Author will provide once information is available **The Report: Nigeria 2013** Oxford Business Group, 2013-12-04 As the single most populous nation in Africa Nigeria recently overtook South Africa as the largest economy on the continent Natural resources oil and gas in particular comprise the country's single largest revenue earner but the 170m person economy also has seen significant activity in recent years into the industrial financial telecoms and as of 2013 power sectors Hydrocarbons reserves have traditionally attracted the vast majority of domestic and foreign investment in Nigeria Oil production capacity has remained at roughly 2.5m barrels per day bpd since the start of 2000 although output fell to 2.2m bpd on average in 2012 Still the country has long operated below its true potential and government efforts in recent years have sought to increase local value addition by boosting refining capacity and minimising theft and bunkering The country's banking sector has been through a significant shake up as well resulting in a far healthier and more robust financial industry while reforms in the telecoms and agricultural sectors have strengthened medium term prospects

as intended by the drafters of the Constitution in Nigeria It interrogates the exercise of the power of impeachment with reference to the intended purpose and examines its failures in the cases of impeachment in the country It analyzes the interplay of power in the governing institutions in Nigeria s political system which involved the understanding of a web of interactions among elites within a political structure relating with others outside its sphere of operation It presents an analysis of the politics associated with impeachment within the framework of the activities of different political actors operating in different political structures assigned to perform certain statutory roles in the political system The book shows how the selective use of impeachment provisions as instrument of political vendetta and harassment has weakened the potency of this oversight power of the legislature thereby engendering accountability problem in the Nigerian presidential system

Protein Phosphorylation in Health and Disease Allegra Via,Andreas Zanzoni,2016-08-11 Protein phosphorylation is one of the most abundant reversible post translational modifications in eukaryotes It is involved in virtually all cellular processes by regulating protein function localization and stability and by mediating protein protein interactions Furthermore aberrant protein phosphorylation is implicated in the onset and progression of human diseases such as cancer and neurodegenerative disorders In the last years tens of thousands of in vivo phosphorylation events have been identified by large scale quantitative phospho proteomics experiment suggesting that a large fraction of the proteome might be regulated by phosphorylation This data explosion is increasingly enabling the development of computational approaches often combined with experimental validation aiming at prioritizing phosphosites and assessing their functional relevance Some computational approaches also address the inference of specificity determinants of protein kinases phosphatases and the identification of phosphoresidue recognition domains In this context several challenging issues are still open regarding phosphorylation including a better understanding of the interplay between phosphorylation and allosteric regulation agents and mechanisms disrupting or promoting abnormal phosphorylation in diseases the identification and modulation of novel phosphorylation inhibitors and so forth Furthermore the determinants of kinase and phosphatase recognition and binding specificity are still unknown in several cases as well as the impact of disease mutations on phosphorylation mediated signaling The articles included in this Research Topic illustrate the very diverse aspects of phosphorylation ranging from structural changes induced by phosphorylation to the peculiarities of phosphosite evolution Some also provide a glimpse into the huge complexity of phosphorylation networks and pathways in health and disease and underscore that a deeper knowledge of such processes is essential to identify disease biomarkers on one hand and design more effective therapeutic strategies on the other

Everyday Schooling in the Digital Age Neil Selwyn,Selena Nemorin,Scott Bulfin,Nicola F. Johnson,2017-11-20 Today s high schools are increasingly based around the use of digital technologies Students and teachers are encouraged to Bring Your Own Device teaching takes place through learning management systems and educators are rushing to implement innovations such as flipped classrooms personalized learning

analytics and maker technologies Yet despite these developments the core processes of school appear to have altered little over the past 50 years As the twenty first century progresses concerns are growing that the basic model of school is broken and no longer fit for purpose This book moves beyond the hype and examines the everyday realities of digital technology use in today s high schools Based on a major ethnographic study of three contrasting Australian schools the authors lay bare the reasons underlying the inconsistent impact of digital technologies on day to day schooling The book examines leadership and management of technology in schools the changing nature of teachers work in the digital age as well as student mis uses of technologies in and out of classrooms In depth case studies are presented of the adoption of personalized learning apps social media and 3D printers These investigations all lead to a detailed understanding of why schools make use of digital technologies in the ways that they do Everyday Schooling in the Digital Age High School High Tech offers a revealing analysis of the realities of contemporary schools and schooling drawing on arguments and debates from various academic literatures such as policy studies sociology of education social studies of technology media and communication studies Over the course of ten wide ranging chapters a range of suggestions are developed as to how the full potential of digital technology might be realized within schools Written in a detailed but accessible manner this book offers an ambitious critique that is essential reading for anyone interested in the fast changing nature of contemporary education
