Ingo Swann, 2018-09-02 Most books about power only deal with the societal formula of the few having power over the enormously larger powerless masses and which is mistaken as the so called natural order of power But it is not well understood that this formula also requires social conditioning measures aimed at perpetuating the continuing depowerment of the powerless so that the powerful CAN have power over them This in turn requires the societal suppression and secretizing of all knowledge about the superlative human powers known to exist in individuals of the human species but which are socially forced into latency in most It is broadly understood that power and secrecy go together but the scope of the web of secrets surrounding the larger nature of human power's is surprising As discussed in this Volume I of SECRETS OF POWER empowerment is difficult if the larger panorama of societal power and depowerment are not more fully understood

The Taft Court: Volume 10 Robert C. Post,2023-11-09 The Taft Court offers the definitive history of the Supreme Court from 1921 to 1930 when William Howard Taft was Chief Justice Using untapped archival material Robert C Post engagingly recounts the ambivalent effort to create a modern American administrative state out of the institutional innovations of World War I He shows how the Court sought to establish authoritative forms of constitutional interpretation despite the culture wars that enveloped prohibition and pervasive labor unrest He explores in great detail how constitutional law responds to altered circumstances The work provides comprehensive portraits of seminal figures such as Oliver Wendell Holmes Jr and Louis Dembitz Brandeis It describes William Howard Taft s many judicial reforms and his profound alteration of the role of Chief Justice A critical and timely contribution The Taft Court sheds light on jurisprudential debates that are just as relevant today as they were a century ago

Machado de Assis and Female Characterization , Earl E. Fitz,2014-11-19 This book examines the nature and function of the main female characters in the nine novels of Machado de Assis The basic argument is that Machado had a particular interest in female characterization and that his fictional women became increasingly sophisticated and complex as he matured and developed

as a writer and social commentator This book argues that Machado developed especially after 1880 and what is usually considered the beginning of his mature period a kind of anti realistic new narrative one that presents itself as self referential fictional artifice but one that also cultivates a keen social consciousness The book also contends that Machado increasingly uses his female characterizations to convey this social consciousness and to show that the new Brazil that is emerging both before and after the establishment of the Brazilian Republic 1889 requires not only the emancipation of the black slaves but the emancipation of its women as well *Renewable Energy* Bent Sorensen,2018-12-14 This four volume set edited by a leading expert in the field brings together in one collection a series of papers that have been fundamental to the development of renewable energy as a defined discipline Some of the papers were first published many years ago but they remain classics in their fields and retain their relevance to the understanding of current issues The papers have been selected with the assistance of an eminent international editorial board The set includes a general introduction and each volume is introduced by a new overview essay placing the selected papers in context The range of subject matter is considerable including coverage of all the main renewable technologies the fundamental principles by which they function and the issues around their deployment such as planning integration and socio economic assessment Overall the set provides students teachers and researchers confronted with thousands of journal articles book chapters and grey literature stretching back decades with a ready made selection of and commentary on the most important key writings in renewable energy It will be an essential reference for libraries concerned with energy technology and the environment Gaṇeśapurāṇa: Upāsanākhaṇḍa ,1995
