*Regression of Democracy?* Gero Erdmann, Marianne Kneuer, 2013-06-21 Democratization since the implosion of the communist bloc displays a mixed balance While the neo democracies in Central Eastern European Countries can be seen as largely consolidated many other processes of democratization in other parts of the world such as Africa Asia and Latin America got stuck as unconsolidated or became defective democracies some regressed into hybrid regimes or were even turned into autocracies While transitology dealt with the transition from authoritarian rule the reverse process the transition from democratic rule remained almost completely outside the scholarly attention This special issue will address the problems of the regression of democracy and aims at closing the gap between research on democracy and democratization on one side and the emergence of authoritarian regimes on the other The contributions of this volume analyse the different phenomena in which decline of democracy fans out the loss of quality which means a silent regression the backslide into hybrid regimes hybridization and the breakdown of democracy     **Cancer Treatment Reports** ,1976     **The Gentleman's Magazine** ,1821     **Geometry from the Pacific Rim** A. Pizer, Thomas R. Shemanske, 1989 The basis problem for modular forms of degree one is to find a basis for a space of modular forms with elements whose Fourier coefficients can be computed explicitly The authors give a general treatment for all cases The main idea in the solution is to consider two kinds of forms theta series associated with special order and bases of primitive neben space     **FCC Record** United States. Federal Communications Commission, 2002     *The Design of Propeller Blade Roots* G. Cordes, 1942 Predicated on the assumption of certain normal conditions for engine and propeller simple expressions for the static and dynamic stresses of propeller blade roots are evolved They in combination with the fatigue strength diagram of the employed material afford for each engine power one certain operating point by which the state of stress serving as a basis for the design of the root is defined Different stress cases must be analyzed depending on the vibration tendency of engine and use of propeller The solution affords an insight into the possible introduction of different size classes of propeller

**Glycoscience: Chemistry and Chemical Biology I-III** Bertram O. Fraser-Reid, Kuniaki Tatsuta, Joachim Thiem, 2012-12-06 Glycostructures play a highly diverse and crucial role in a myriad of organisms and important systems in biology physiology medicine bioengineering and technology Only in recent years have the tools been developed to partly understand the highly complex functions and the chemistry behind them but many facts still remain undiscovered All roads lead to carbohydrates we cannot do without them K C Nicolaou Presently the field is experiencing a quantum jump Therefore the editors have drawn together in this three volume set plus an accompanying CD ROM the complete and up to date information on glycostructures their chemistry and chemical biology and present them in the form of a comprehensive and

strictly systematic survey The texts are furnished by 2 670 figures chemical structures and reaction schemes including more than 12 000 individual chemical reactions and more than 9 000 references *New Monthly Magazine, and Universal Register*, 1815 *Foreign Commerce and Navigation of the United States* United States. made available in this volume three for the first time in English and sixteen others for the first time since C de B Evans translated them in 1924 and 1931 long before the critical editions of the manuscripts were published in 2003 Other important sermons are included in the translations as well They improve upon previous translations which were not as sensitive to Eckhart s metaphorical repertoire and his subtle word choice and phrasing The extended introductory essay describes Eckhart s metaphors and how they work together to form a cohesive whole By looking at what his metaphors tell us about what an individual person is and how the view of the individual changed in the late medieval world his ostensibly shocking rhetoric in places where it is actually novel is shown to be indicative of a larger cultural tide that culminated in the modern worldview Finally all of his homiletic choices are shown to be in service of the greater goal catalyzing transformative change in his audience by stubbornly insisting on his paradoxes and jarring people out of their customary way of relating to God and themselves
