Claxton, 2022 This practical guide to criminal evidence first published in 1990 provides a succinct and clear explanation of the different kinds of evidence admissible in criminal cases the rules excluding certain categories of evidence and the exceptions to those rules Comprehensive without being encyclopedic or overwhelming the work is an ideal study aid for law students learning about the criminal process graduates preparing for the bar exam or legal practitioners in need of a handy courtroom reference Washing the Brain Andrew Goatly, 2007-01-01 Contemporary metaphor theory has recently begun to address the relation between metaphor culture and ideology In this wide ranging book Andrew Goatly using lexical data from his database Metalude investigates how conceptual metaphor themes construct our thinking and social behaviour in fields as diverse as architecture engineering education genetics ecology economics politics industrial time management medicine immigration race and sex He argues that metaphor themes are created not only through the universal body but also through cultural experience so that an apparently universal metaphor such as event structure as realized in English grammar is in fact culturally relative compared

with e.g. the construal of cause and effect in the Algonquin language Blackfoot. Moreover, event structure as a model is both scientifically reactionary and as the basis for technological mega projects has proved environmentally harmful. Furthermore, the ideologies of early capitalism created or exploited a selection of metaphor themes historically traceable through Hobbes, Hume, Smith, Malthus, and Darwin. These metaphorical concepts support neo-Darwinian and neo-conservative ideologies apparent at the beginning of the 21st century, ideologies underpinning our social and environmental crises. The conclusion therefore recommends skepticism of metaphor's reductionist tendencies.

Practical Guide to Evidence Christopher Allen, 2008. Practical Guide to Evidence provides a clear and readable account of the law of evidence, acknowledging the importance of arguments about facts and principles as well as rules. The fourth edition has been revised and updated to address the radical changes brought about by the Criminal Justice Act 2003, particularly in relation to hearsay, character evidence, and opinion evidence, and to expand coverage of the Human Rights Act 1998. Particular attention is given to changes made by the revised Codes of Practice and to the growing body of case law on topics such as reverse burden of proof, the cross-examination of rape victims, evidence obtained by entrapment, and silence in the face of police questioning. Now including enhanced pedagogical support such as chapter summaries, further reading advice, and boxed examples, this leading textbook can be used on both undergraduate and professional courses.
