## **Practical Biology On 18 June 2015 In Malawi:**

**Agroecology in Policy and Practice** Rachel Bezner Kerr, Hans Rudolf Herren, Barbara Gemmill-Herren, Caterina Batello Cattaneo, Franz-Theo Gottwald, 2023-10-13 In the past years there has been steady growth in work relating to agroecology. People-centred knowledge intensive and rooted to sustainability it is now well established that agroecology matches the transformative approach called for by the 2030 Agenda: a transition to sustainable food and agriculture systems that ensures food security and nutrition for all, provides social and economic equity and conserves biodiversity and the ecosystem services on which agriculture depends. Although not a new concept, agroecology is today gaining interest worldwide among a wide range of actors as an effective answer to climate change and the interrelated challenges facing food systems, finding expression in the practices of food producers in grassroots social processes for sustainability and the public policies of many countries around the world. Achieving sustainable management of tropical forests Professor Jürgen Blaser, Mr Patrick D. Hardcastle, 2020-10-27 Explores the broader economic, political and environmental context in which management of tropical forests needs to operate. Particular focus on management structures and techniques to achieve sustainable forest management (SFM) on the ground. Includes case studies of practical experience of managing tropical forests in South America, West Africa and Southeast Asia. **Metrics** Vincanne Adams, 2016-03-05 This volume's contributors evaluate the accomplishments, limits and consequences of using quantitative metrics in global health. Whether analyzing maternal mortality rates, the relationships between political goals and metrics data or the links between health outcomes and a program's fiscal support, the contributors question the ability of metrics to solve global health problems. They capture a moment when global health scholars and practitioners must evaluate the potential effectiveness and pitfalls of different metrics even as they remain elusive and problematic. Contributors: Vincanne Adams, Susan Erikson, Molly Hales, Pierre Minn, Adeola Oni, Orisan Carolyn Smith, Morris Marlee Tichenor, Lily Walkover, Claire L. Wendland. Addressing forestry and agroforestry in National Adaptation Plans Meybeck, A. ; Gitz, V. ; Wolf, J. ; Wong, T., 2021-11-30 The Addressing forestry and agroforestry in National Adaptation Plans Supplementary guidelines provide specific guidance for national adaptation planning in the forestry sector. They are intended to be used by national planners and decision makers working on climate change issues in developing countries and authorities and experts who are contributing to climate change adaptation and NAP formulation and implementation. Climate Change Resilience in Rural Southern Africa Mark Matsa, Lazarus Chapungu, Godwell Nhamo, 2024-12-17 In rural Southern Africa the livelihoods of millions are intricately linked to the land, water and ecosystems that are increasingly under threat from climate change. This intensifying threat has exacerbated pre-existing vulnerabilities, rendering the need for resilience building more critical than ever. Emerging scholarship on climate change strategies suggest that building resilience in human and environmental systems is the ideal strategy for combating the climate change induced catastrophes. Rural Southern Africa has witnessed both isolated and coordinated efforts by

various stakeholders to bolster climate resilience yielding varying degrees of success This book offers a comprehensive examination of the rural Southern African landscape probing the intricate dynamics prospects and challenges associated with building climate resilience It examines how traditional knowledge innovative practices including Artificial Intelligence and sustainable development strategies are converging to create resilient systems The book further highlights the critical role of local communities in addressing climate challenges and offers actionable insights for a more resilient future It emerged that some interventions have managed to build resilience of at risk households communities and systems while others have faced significant challenges In general climate resilience building remains complex and lagging due to increased vulnerabilities induced by global disease emergencies such as COVID 19 increased poverty due to global recessions poor governance corruption and several other internal and external factors Therefore the need to increase cooperation amongst Southern African states to pursue common development goals cannot be overemphasized Rich with case studies expert analyses and systematic reviews this book is an essential read for policymakers researchers and those invested in the future of rural Southern Africa

**Cultural Values in Political Economy** J.P. Singh, 2020-08-25 This masterful collection illuminates many of the all important interfaces between culture and economy These insights have never been more important W Lance Bennett author of *News The Politics of Illusion* The backlash against globalization and the rise of cultural anxiety has led to considerable rethinking among social scientists This book provides multiple theoretical historical and methodological orientations to examine these issues While addressing the rise of populism worldwide the volume provides explanations that cover periods of both cultural turbulence and stability Issues addressed include populism and cultural anxiety class religion arts and cultural diversity global environment norms international trade and soft power The interdisciplinary scholarship from well known contributors questions the oft made assumption in political economy that holds culture constant which in practice means marginalizing it in the explanation The volume conceptualizes culture as a repertoire of values and alternatives Locating human interests in underlying cultural values does not make political economy s strategic or instrumental calculations of interests redundant The instrumental logic follows a social context and a distribution of cultural values while locating forms of decision making that may not be rational
