without some form of long term orientation and all have implemented at least some elements of the relationship marketing concept. Even in the consumer goods sector there are a growing number of cases where the traditional orientation towards brand equity is being complemented by a relational focus. As Berry has mentioned, relationship marketing is a new old concept. Several important aspects of relationship marketing were already being discussed in the marketing literature. This applies both to central constructs such as customer satisfaction and to single elements such as the management of complaints and after sales services. Although they do not involve explicit mention of the term relationship marketing, a long term orientation can be found in the network approach of industrial marketing closely related to the work of the IMP Group, in the work of Gronroos, Gummesson and their colleagues at the Nordic School of Services Marketing and last but not least in the concept of customer focused marketing.
