Practical Work Life Science February 2015:

The Big Ideas in Physics and How to Teach Them Ben Rogers, 2018-04-18 The Big Ideas in Physics and How to Teach Them provides all of the knowledge and skills you need to teach physics effectively at secondary level. Each chapter provides the historical narrative behind a Big Idea, explaining its significance, the key figures behind it, and its place in scientific history. Accompanied by detailed ready-to-use lesson plans and classroom activities, the book expertly fuses the what to teach and the how to teach it, creating an invaluable resource which contains not only a thorough explanation of physics but also the applied pedagogy to ensure its effective translation to students in the classroom. Including a wide range of teaching strategies, archetypal assessment questions, and model answers, the book tackles misconceptions and offers succinct and simple explanations of complex topics. Each of the five big ideas in physics are covered in detail: electricity, forces, energy, particles, and the universe. Aimed at new and trainee physics teachers, particularly non-specialists, this book provides the knowledge and skills you need to teach physics successfully at secondary level and will inject new life into your physics teaching.

Ethical Competence in Nursing Practice Catherine Robichaux, Catherine M. Robichaux, 2016-09-07 This is a unique, innovative professional nursing ethics textbook designed specifically for all practicing nurses and to meet the educational needs of all nursing students, including RN to BSN and RN to MSN students. Written by experts in the field, it discusses ethical concepts relevant to the registered nurse who has practiced for several years but is learning higher-level concepts and applications. This text addresses different areas of professional practice and is rich with case studies illustrating the need for ethical competence and decision making. The book fulfills the necessary criteria for the AACN Essentials for Baccalaureate Education and the QSEN and IOM competencies. It also integrates relevant provisions and statements from the revised Code for Nurses, ANA 2015. Clear and concise, the text relates content to the nurse's current practice and introduces a framework for the development of ethical competence, from recognition of an ethical situation to implementation of a justifiable action. A decision-making model that includes elements of care and virtue ethics is also included. Essential communication and conflict skills are addressed in addition to the role of the ethics committee and ethics consultation. The book discusses common ethical issues likely to be encountered, how to recognize and address moral distress, and ethical practice as it relates to research quality and safety. Case studies that incorporate evidence-informed research provide the opportunity to develop ethical skills and apply decision-making principles. Relevant QSEN competencies and provisions and statements from the ANA's revised Code for Nurses 2015 are featured in each chapter. Interactive exercises and questions and PowerPoints provide further opportunity for critical thinking.

a holistic approach to a range of subjects that people usually explore in isolation Practical Implementation Science Bryan J. Weiner, Cara C. Lewis, Kenneth Sherr, 2022-03-18 Prose Award Finalist for Nursing and Allied Health Services Category Awarded First Place in the AJN 2022 Book of the Year Awards in the Community Public Health Category Practical Implementation Science Moving Evidence Into Action provides the ideal text for a master's level implementation science course. It fills an important gap by focusing on building skills among trainees whose careers will focus more on implementation practice than research and prepares them to partner with scientists to enhance effective implementation in public health and health systems. Most importantly, my students feel that the book is helping make a topic that can be experienced as complex very accessible. Donna Shelley MD MPH Professor Dept Public Health Policy and Management Director Global Center for Implementation Science NYU School of Global Public Health Practical Implementation Science is designed for graduate health professional and advanced undergraduate students who want to master the steps of using implementation science to improve public health. Engaging and accessible, this textbook demonstrates how to implement evidence-based practices effectively through use of relevant theories, frameworks, models, tools, and research findings. Additional real-world case studies across public health, global health, and health policy provide essential context to the major issues facing implementation domestically and globally with consideration of communities in low to middle income countries (LMIC). The textbook is organized around the steps involved in planning, executing, and evaluating implementation efforts to improve health outcomes in communities. Coverage spans assessing the knowledge-practice gap, selecting an evidence-based practice (EBP) to reduce the gap, assessing EBP fit and adapting the EBP, assessing barriers and facilitators of implementation, engaging stakeholders, creating an implementation structure, implementing the EBP, and evaluating the EBP effort. Each chapter includes a how-to approach to conducting the task at hand. The text also addresses the practical importance of implementation science through disseminating EBPs, scaling up EBPs, sustaining EBPs, and deimplementing practices that are no longer effective. All chapters include learning objectives and summaries with emphasized Key Points for Practice, Common Pitfalls in Practice, and discussion questions to direct learning and classroom discussion. Fit for students of public health, health policy, nursing, medicine, mental health, behavioral health, allied health, and social work, Practical Implementation Science seeks to bridge the gap from scientific evidence to effective practice. Key Features: Soup to Nuts Approach: Distills the steps to selecting, adapting, implementing, evaluating, scaling up, and sustaining evidence-based practices. Expert Insight: Editors and chapter authors bring years of experience from leading implementation programs and interventions. Multidisciplinary Focus: Utilizes cases and research findings relevant to students of public health, medicine, nursing, mental health, behavioral health, and social work. Case Studies and Real World Examples: Blends frameworks, models, and tools with real-world examples for students interested in both domestic and global health. eBook Access: Included with print purchase for use on most mobile devices or computers. Instructor's Packet: Complete with an Instructor's Manual, PowerPoint slides, and
