

## Typical Gate

Figure 1 below and right is a typical flush mounted Handwheel actuated gate. It is meant to be installed on a concrete or similarly hard flat surface covering an opening through which water will flow and be controlled manually using the Handwheel. A Bill of Materials, also called a Cut List, located top right in the drawing details the components and measurements of this gate. Watch Technologies will use a drawing like this one to manufacture a gate. Note the holes marked on the lower right portion of the frame and the measurements indicating their spacing; these are the holes used for mounting this gate to a surface. Unless otherwise noted, these holes are always 5/8" and sized to allow for 1/2" threaded rod or Wedge-Anchors typically recommended for mounting.
