Service Research Challenges and Solutions for the

Future Internet M. Papazoglou,Klaus Pohl,Michael Parkin,Andreas Metzger,2010-12-15 S Cube s Foundations for the Internet of Services Today s Internet is standing at a crossroads The Internet has evolved from a source of information to a critical infrastructure which underpins our lives and economies The demand for more multimedia content more interconnected devices more users a richer user experience services available any time and anywhere increases the pressure on existing networks and service platforms The Internet needs a fundamental rearrangement to be ready to meet future needs One of the areas of research for the Future Internet is the Internet of S vices a vision of the Internet where everything

e.g. information software platforms and infrastructures is available as a service. Services available on the Internet of Services can be used by anyone if they are used according to the policies defined by the provider and they can be extended with new services by anyone. Advantages of the Internet of Services include the possibility to build upon other people's efforts and the little investment needed upfront to develop an application. The risk involved in pursuing new business ideas is diminished and might lead to more innovative ideas being tried out in practice. It will lead to the appearance of new companies that are able to operate in niche areas providing services to other companies that will be able to focus on their core business.

Handbook of Research on Natural Language Processing and Smart Service Systems Pazos-Rangel, Rodolfo

Abraham, Florencia-Juarez, Rogelio, Paredes-Valverde, Mario Andrés, Rivera, Gilberto, 2020-10-02. Natural language processing. NLP is a branch of artificial intelligence that has emerged as a prevalent method of practice for a sizeable amount of companies. NLP enables software to understand human language and process complex data that is generated within businesses. In a competitive market, leading organizations are showing an increased interest in implementing this technology to improve user experience and establish smarter decision-making methods. Research on the application of intelligent analytics is crucial for professionals and companies who wish to gain an edge on the competition. The Handbook of Research on Natural Language Processing and Smart Service Systems is a collection of innovative research on the integration and development of intelligent software tools and their various applications within professional environments. While highlighting topics including discourse analysis, information retrieval, and advanced dialog systems, this book is ideally designed for developers, practitioners, researchers, managers, engineers, academicians, business professionals, scholars, policymakers, and students seeking current research on the improvement of competitive practices through the use of NLP and smart service systems.

Service Design for Emerging Technologies Product Development Umar Zakir Abdul Hamid, Mari

Suoheimo, 2023-07-20. The productization of emerging technologies related to the Fourth Industrial Revolution (FIR) is now getting more attention across different industries. Compared to the previous industrial transformations that the world has seen, which relied on mechanical innovations, the ongoing FIR is seeing software and data-driven products as the foundation. Apart from that, topics such as circular and sustainable economy, as well as climate change, are also disrupting the industrial ecosystem. For a viable and successful productization of emerging technologies, collaborations between interdisciplinary stakeholders are a necessity. One of the elements that has been identified to facilitate this collaboration is service design. This book aimed to provide comprehensive service design discussions for practitioners in different fields and sectors. The aim is to bridge the knowledge gap between experts in academia, business, and product development among many others to provide a unified understanding of the importance of service design for the productization of emerging technologies. The book consists of an overview of emerging technologies, product development, and service design, as well as perspectives from different sectors of the industry. The book is expected to benefit multidisciplinary researchers, practitioners, and general audiences.
