QuoteWerks User Manual , Implementing a Data Warehouse Bruce Russell Ullrey,2007 The purpose of this book is to document the methodology and chronology of work activity used by the author to successfully implement a Data Warehouse Each of the eleven steps of the methodology is reviewed in the book often using actual working documents as examples The book contains lessons learned both good and bad as well as measures of success for each step An essential aspect of DW project implementation and other IT projects as well is using established business practices to manage development and implementation Discussion of use of these due diligence practices in Step 1 establishes the foundation for starting the DW project with the proper levels of management oversight Step 2 presents examples of business models necessary for the DW developer to understand the needs of the business that the DW will serve Other DW books describe the data modeling process but neglect to provide modeling instruction and actual examples to insure that the DW is properly aligned with business needs An elegant data warehouse that doesn t meet the needs of the business is wasted effort Step 3 documents and displays the level of detail needed to define CSF s Critical Success Factors and KPI s Key Performance Indicators If calculations for these important metrics are not defined in detail and consensus to use them is not reached then again the most elegant data warehouse implementation is a wasted effort In addition developing and documenting functional

requirements is essential in identifying legacy system reporting deficiencies Step 4 describes how to access and display field level information on the iSeries platform Actual shots of the resulting screens are shown Step 5 presents the functional contents of an RFP for a Data Warehousing tool set Step 6 presents the progression of work required to build a data warehouse Step 6 also Describes and displays a hybrid dimensional to flat file data model that may be in reality the best data organizational model for a typical data warehouse Also a table is included showing examples of data file field cryptic names and their corresponding metadata name nb

Computer Performance Evaluation Ramon Puigjaner, Nunzio N. Savino, Bartomeu Serra, 2003-06-26 The need to evaluate computer and communication systems performance and dependability is continuously growing as a consequence of both the increasing complexity of systems and the user requirements in terms of timing behaviour The 10th International Conference on Modelling Techniques and Tools for Computer Performance Evaluation held in Palma in September 1998 was organised with the aim of creating a forum in which both theoreticians and practitioners could interchange recent techniques tools and experiences in these areas This meeting follows the predecessor conferences of this series 1984 Paris 1988 Palma 1994 Wien 1985 Sophia Antipolis 1991 Torino 1995 Heidelberg 1987 Paris 1992 Edinburgh 1997 Saint Malo The tradition of this conference series continued this year where many high quality papers were submitted The Programme Committee had a difficult task in selecting the best papers Many new papers could not be included in the program due to space constraints All accepted papers are included in this volume Also a set of submissions describing performance modelling tools was transformed into tool presentations and demonstrations A brief description of these tools is included in this volume The following table gives the overall statistics for the submissions
