William David Pence, Milo Smith Ketchum, 1915      *Human-Centred Software Engineering* Regina Bernhaupt, Peter  
Forbrig, Jan Gulliksen, Marta Kristín Lárusdóttir, 2010-11-18 The conference series HCSE Human Centred Software  
Engineering was established four years ago in Salamanca HCSE 2010 is the third working conference of IFIP Working Group  
13 2 Methodologies for User Centered Systems Design The goal of HCSE is to bring together researchers and practitioners  
interested in strengthening the scientific foundations of user interface design examining the relationship between software  
engineering and human computer interaction and focusing on how to strengthen user centered design as an essential part of  
software engineering processes As a working conference substantial time was devoted to the open and lively discussion of  
papers The interest in the conference was positive in terms of submissions and participation We received 42 contributions that  
resulted in 10 long papers 5 short papers and 3 poster papers The selection was carried out carefully by the International  
Program Committee The result is a set of interesting and stimulating papers that address such important issues as contextual  
design user aware systems ubiquitous environments and usability evaluation The final program of the conference included a  
keynote by Liam Bannon with the title Approaches to Software Engineering A Human Centred Perspective This talk raised a  
lot of interesting questions for IFIP WG 13 2 and might have had some impact for participants to become a member of the  
working group We hope that participants considered HCSE 2010 as successful as its two predecessors in terms of interesting
