Re-thinking the Political Economy of Immigration Control Lea Sitkin, 2019-10-08 This book offers a systematic exploration of the changing politics around immigration and the impact of resultant policy regimes on immigrant communities It does so across a uniquely wide range of policy areas immigration admissions citizenship internal immigration controls labour market regulation the welfare state and the criminal justice system Challenging the current state of theoretical literature on the criminalisation or marginalisation of immigrants this book examines the ways in which immigrants are treated differently in different national contexts as well as the institutional factors driving this variation To this end it offers data on overall trends across 20 high income countries as well as more detailed case studies on the UK Australia the USA Germany Italy and Sweden At the same time it charts an emerging common regime of exploitation which threatens the depiction of some countries as more inclusionary than others The politicisation of immigration has intensified the challenge for policy makers who today must respond to populist calls for restrictive immigration policy whilst simultaneously heeding business groups calls for cheap labour and respecting legal obligations that require more liberal and welcoming policy regimes The resultant policy regimes often have counterproductive effects in many cases marginalising immigrant communities and contributing to the growth of underground and criminal economies Finally developments on the horizon driven by technological progress threaten to intensify distributional challenges While these will make the politics around immigration even more fraught in coming decades the real issue is not immigration but the loss of good jobs which will have serious implications across all Western countries This book will appeal to scholars and students of criminology social policy political economy political sociology the sociology of immigration and race and migration studies

Interrogating the Visual Culture of Trumpism Grant Hamming, Natalie E. Phillips, 2024-08-26 Bringing together scholars from art history visual studies and related disciplines this edited volume asks why Trumpism looks the way it does and what that look means for American and global society Grouped into six categories the essays in this volume tackle some of the most perplexing and urgent aspects of the Trumpist visual project Two of the most striking aspects of that project are its use of novel commodity forms including the iconic red baseball

caps as well as its embrace of social media Trump's outlandish persona and striking physicality have lent themselves to caricature both from his critics and perhaps more surprisingly his supporters That physicality as well as his movement's hearkening back to a mostly imagined era of mid twentieth century prosperity has also brought gender and the body into sharp focus Perhaps second only to the aforementioned red hat is Trumpism's vigorous use of interventions into public space including traditional campaign signs as well as flags and other ad hoc visual and architectural materials Finally there were the events of January 6 2021 when many of Trumpism's most outré visual and cultural preoccupations exploded from the shadows onto television screens across the country Taken as a whole the essays in this book examine Trumpist visuality from the seemingly trivial to the starkly horrifying as well as offering a measured sense of the various resistances and responses that have characterized artistic responses to Trump from the beginning of his prominence The book will be of interest to scholars working in art history visual culture American studies and cultural and media studies
