Pak, Artem I. Krivtsov, Natalia S. Zagrebelnaya, 2022-07-30 This book offers a broad and holistic overview of issues in the Arctic today a region which is transforming due to changing world order and climate agenda While new economic opportunities and with China as well as other geopolitical players in the region are emerging new security challenges are arising as well In this comprehensive scholarly resource contributors from around the world and from a broad variety of disciplines share their thoughts on the future of the Arctic in a manuscript that will be of interest to researchers economists and policymakers **Quantifying Uncertainty in Subsurface Systems** Céline Scheidt, Lewis Li, Jef Caers, 2018-04-27 Under the Earth's surface is a rich array of geological resources many with potential use to humankind However extracting and harnessing them comes with enormous uncertainties high costs and considerable risks The valuation of subsurface resources involves assessing discordant factors to produce a decision model that is functional and sustainable This volume provides real world examples relating to oilfields geothermal systems contaminated sites and aquifer recharge Volume highlights include A multi disciplinary treatment of uncertainty quantification Case studies with actual data that will appeal to methodology developers A Bayesian evidential learning framework that reduces computation and modeling time Quantifying Uncertainty in Subsurface Systems is a multidisciplinary volume that brings together five major fields information science decision science geosciences data science and computer science It will appeal to both students and practitioners and be a valuable resource for geoscientists engineers and applied mathematicians Read the Editors Vox <https://eos.org/editors-vox-quantifying-uncertainty-about-earths-resources> **The Storm-petrels** Rob Thomas, 2024-07-25 The first definitive work on the European Storm petrel and its relatives by one of the world's leading experts on the species Imagine a bird as small as a sparrow which lives most of its life on the open ocean yet can survive for decades It walks on water and migrates half way around the world returning to remote islands to breed underground often in the same rock crevice each year At night it lays an enormous egg feeding its chick until the nestling weighs more than both parents put together It

seems to have little fear of humans but was itself feared by ancient seafarers This might sound like the stuff of legend but is actually the description of a real creature the storm petrel walker on water global wanderer climate sentinel and open ocean survivor In this beautifully written monograph Rob Thomas explores the remarkable life of the European Storm petrel comparing and contrasting its behaviour and ecology across its range and with the other storm petrels of the world We learn about their evolution taxonomy migration and adaptations to a life in the harsh open ocean while also discovering what these enigmatic seabirds are revealing about what humans are doing to our planet Illustrated with 150 photographs and including the author's personal anecdotes and observations Storm petrels highlights some of the most exciting recent research findings and sets a trajectory for future discoveries *The Handbook of New Zealand Mammals* Carolyn King, David Forsyth, 2021-01-20

The Handbook of New Zealand Mammals is the only definitive reference on all the land breeding mammals recorded in the New Zealand region including the New Zealand sector of Antarctica It lists 65 species including native and exotic wild and feral living and extinct residents vagrants and failed introductions It describes their history biology and ecology and brings together comprehensive and detailed information gathered from widely scattered or previously unpublished sources The description of each species is arranged under standardised headings for easy reference Because the only native land breeding mammals in New Zealand are bats and seals the great majority of the modern mammal fauna comprises introduced species whose arrival has had profound effects both for themselves and for the native fauna and flora The book details changes in numbers and distribution for the native species and for the arrivals it summarises changes in habitat diet numbers and size in comparison with their ancestral stocks and some of the problems they present to resource managers For this third edition the text and references have been completely updated and reorganised into Family chapters The colour section includes 14 pages of artwork showing all the species described and their main variations plus two pages of maps *Wildlife Research in Australia* Bradley P. Smith, Jordan O. Hampton, Helen P. Waudby, Corinne Alberthsen, 2022-07

Wildlife Research in Australia Practical and Applied Methods is a guide to conducting wildlife research in Australia It provides advice on working through applications to animal ethics committees presents general operating procedures for a range of wildlife research methods and details animal welfare considerations for all Australian taxa Compiled by over 200 researchers with extensive experience in field based wildlife research teaching and animal ethics administration this comprehensive book supports best practice research methods and helps readers navigate the institutional animal care approval process *Wildlife Research in Australia* will help foster a national approach to wildlife research methods and is an invaluable tool for researchers teachers students animal ethics committee members and organisations participating in wildlife research and other activities with wildlife *The Action Plan for Australian Birds 2020* Stephen T. Garnett, G Barry Baker, 2021-12-01 *The Action Plan for Australian Birds 2020* is the most comprehensive review of the status of Australia's avifauna ever attempted The latest in a series of action plans for Australian birds that have been produced every

decade since 1992 it is also the largest The accounts in this plan have been authored by more than 300 of the most knowledgeable bird experts in the country and feature far more detail than any of the earlier plans This volume also includes accounts of over 60 taxa that are no longer considered threatened mainly thanks to sustained conservation action over many decades This extensive book covers key themes that have emerged in the last decade including the increasing impact of climate change as a threatening process most obviously in Queensland s tropical rainforests where many birds are being pushed up the mountains However the effects are also indirect as happened in the catastrophic fires of 2019 20 Many of the newly listed birds are subspecies confined to Kangaroo Island where fire destroyed over half the population But there are good news stories too especially on islands where there have been spectacular successes with predator control Such uplifting results demonstrate that when action plans are followed by action on the ground threatened species can indeed be recovered and threats alleviated

Extinct Birds Julian P. Hume, 2017-08-24 A comprehensive review of the hundreds of bird species that have become extinct over the last 1 000 years of habitat degradation over hunting and rat introduction Extinct Birds has become the standard text on this subject covering both familiar icons of extinction as well as more obscure birds some known from just one specimen or from travellers tales This second edition is expanded to include dozens of new species as more are constantly added to the list either through extinction or through new subfossil discoveries The book is the result of decades of research into literature and museum drawers as well as caves and subfossil deposits which often reveal birds long gone

that disappeared without ever being recorded by scientists while they lived From Great Auks Carolina Parakeets and Dodos to the amazing yet almost completely vanished bird radiations of Hawaii and New Zealand via rafts of extinction in the Pacific and elsewhere this book is both a sumptuous reference and astounding testament to humanity's devastating impact on wildlife

Conservation of Marine Birds Lindsay Young, Eric VanderWerf, 2022-09-27 Conservation of Marine Birds is the first book to outline and synthesize the myriad of threats faced by one of the most imperiled groups of birds on earth With more than half of all 346 seabird species worldwide experiencing population declines and 29% of species recognized as globally threatened by the International Union for Conservation of Nature the timing to determine solutions to threats could not be more urgent Written by a diverse team of international experts on marine birds this book explores the environmental and biogeographical factors that influence seabird conservation and provides concrete recommendations for mounting climate change issues This book will be an important resource for researchers and conservationists as well as ecologists and students who want to understand seabirds the threats they are facing and tactics to help conserve and protect them Outlines both threats and solutions in the marine and terrestrial realm Synthesizes information to provide a comprehensive strategy moving forward especially considering climate change Created by a team of experts with the latest and most comprehensive knowledge of seabird conservation

Australian Island Arks Dorian Moro, Derek Ball, Sally Bryant, 2018-02-01 Australia is the custodian of a diverse range of continental and oceanic islands From Heard and Macquarie in the sub Antarctic to temperate Lord Howe and Norfolk to the tropical Cocos Keeling Islands and the islands of the Great Barrier Reef Australia's islands contain some of the nation's most iconic fauna flora and ecosystems They are a refuge for over 35% of Australia's threatened species and for many others declining on mainland Australia They also have significant cultural value especially for Indigenous communities and economic value as centres for tourism Australian Island Arks presents a compelling case for restoring and managing islands to conserve our natural heritage With contributions from island practitioners researchers and policy makers it reviews current island management practices and discusses the need and options for future conservation work Chapters focus on the management of invasive species threatened species recovery conservation planning Indigenous cultural values and partnerships tourism enterprises visitor management and policy and legislature Case studies show how island restoration and conservation approaches are working in Australia and what the emerging themes are for the future Australian Island Arks will help island communities managers visitors and decision makers to understand the current status of Australia's islands their management challenges and the opportunities that exist to make best use of these iconic landscapes

Antarctic Krill and Interactions in the East Antarctic Ecosystem So Kawaguchi, Sophie Bestley, Martin Cox, Kerrie M. Swadling, Elanor Bell, 2025-08-19 Antarctic krill *Euphausia superba* is the target of the largest commercial fishery in the Southern Ocean Its abundance varies regionally and exhibits great interannual variability This natural variability combined with climate change effects could have substantial consequent impacts on krill predators and the

magnitude of ecologically sustainable fishery catch limits Recent increase in the krill catch is due to technological developments in both harvesting and catch processing methods as well as interest in new products derived from krill e.g dietary supplements and pet food The krill fishery is managed by the Commission for the Conservation of Antarctic Marine Living Resources CCAMLR The krill fishery first commenced in 1970 s off East Antarctica but the main fishing ground shifted to the South Atlantic sector from the 1990 s Interest to fish off East Antarctica has been expressed by CCAMLR Member nations in recent years and the krill fishery recommenced in Indian Ocean sector of East Antarctic sector in the 2016 17 fishing season Given the increase in recent commercial interest the trigger level total allowed catch in one of the management areas CCAMLR Subarea 48 1 has been reached seven times in the Southwest Atlantic the East Antarctic fishery is likely to expand in coming years CCAMLR employs an ecosystem based management approach This requires a wide range of data and information from across regional ecosystem components In the southwest Atlantic sector krill management is based on large scale krill biomass surveys undertaken in 2000 and 2019 together with various national Antarctic programs conducting annual regional scale monitoring this provides assessments of year to year variation of krill ecosystem parameters for CCAMLR to ensure harvesting is carried out in a sustainable manner Contrary to the relatively data rich Southwest Atlantic sector current precautionary catch limits for the krill fishery off East Antarctica are solely based on information collected through the two large scale multidisciplinary surveys conducted by Australia in Divisions 58 4 1 in 1996 and 58 4 2 in 2006 This Research Topic gathers up to date scientific analysis on the East Antarctic ecosystem arising from recent marine science voyages such as ENRICH Euphausiids and Nutrient Recycling In Cetacean Hotspots in 2019 and TEMPO Trends in Euphausiids off Mawson Predators and Oceanography in 2021 Our topic provides an opportunity to explore ecosystem wide scientific studies including non exclusively krill biomass ecosystem structure and interactions between krill krill predators oceanography and primary production to inform sustainable krill fishery management in the region

Island Ecosystems Stephen J. Walsh, Carlos F. Mena, Jill R. Stewart, Juan Pablo Muñoz Pérez, 2023-05-10 Sustainable development is a process to improve the quality of life of people while maintaining the ability of social ecological systems to continue to provide valuable ecological services that social systems require In the Galapagos Islands the maintenance of amenity resources to support tourism and the quality of life of residents is explicitly linked to ecosystem goods and services particularly the accessibility to high quality natural environments and the terrestrial and marine visitation sites that showcase iconic species On June 26 30 2022 the Galapagos Science Center celebrated its 10 Year Anniversary As the crowning event of the anniversary celebration the World Summit on Island Sustainability was held on San Cristobal Island Galapagos Archipelago of Ecuador The intent of the World Summit was to bring together leading experts on island ecosystems and particularly on island sustainability from across the globe to represent a diversity of perspectives approaches and stakeholder groups The World Summit was an exclusive event that featured an expert convening of scholars and

practitioners to address the social terrestrial and marine sub systems of the Galapagos Islands and other similarly challenged island ecosystems from around the globe The World Summit attracted 150 scientists to the Galapagos Islands to discuss projects conducted for instance in the Galapagos Islands Hawaii Guam French Polynesia Chile Australia and the Caribbean Islands Island vulnerability resilience and sustainability were examined by scholars for instance from the University of North Carolina at Chapel Hill Universidad San Francisco de Quito Catholic University of Chile University of Guam James Cook University University of the Sunshine Coast North Carolina State University North Carolina Museum of Natural Sciences California Academy of Sciences University of San Francisco and the University of South Alabama as well as affiliated scientists from Exeter University University of Edinburgh University of Southampton and the Galapagos National Park The World Summit also included scholars from Re wild World Wildlife Fund EarthEcho and the East West Center Hawaii

Oceanic Birds of the World Steve N. G. Howell,Kirk Zufelt,2019-08-20 A state of the art photographic field guide to the world s oceanic birds Oceanic birds are among the most remarkable but least known of all birds living at sea far from the sight of most people They offer unusual identification challenges many species look similar and it can be difficult to get good views of fast flying birds from a moving boat The first field guide to the world s oceanic birds in more than two decades this exciting and authoritative book draws on decades of firsthand experience on the open seas It features clear text filled with original insights and new information and more than 2 200 carefully chosen color images that bring the ocean and its remarkable winged inhabitants to life Never before have oceanic birds been presented in such an accessible and comprehensive way The introduction discusses the many recent developments in seabird taxonomy which are incorporated into the species accounts and these accounts are arranged into groups that aid field identification Each group and species complex has an introductory overview of its identification challenges illustrated with clear comparative photos The text describes flight manner plumage variation related to age and molt seasonal occurrence patterns migration routes and many other features The result is an indispensable guide for exploring birding s last great frontier A comprehensive authoritative and accessible guide to oceanic birds Covers more than 270 species Includes more than 2 200 color photos with concise captions noting key features Features careful species comparisons overviews of the latest taxonomy tips on how to observe and ID birds at sea and much more

Birds of Maine Peter D. Vickery,Charles D. Duncan,Jeffrey V. Wells,William J. Sheehan,2020-11-03 A comprehensive and beautifully illustrated overview to the birds of Maine The first comprehensive overview of Maine s incredibly rich birdlife in more than seven decades Birds of Maine is a detailed account of all 464 species recorded in the Pine Tree State It is also a thoroughly researched accessible portrait of a region undergoing rapid changes with southern birds pushing north northern birds expanding south and once absent natives like Atlantic Puffins brought back by innovative conservation techniques pioneered in Maine Written by the late Peter Vickery in cooperation with a team of leading ornithologists this guide offers a detailed look at the state s dynamic avifauna from the Wild Turkey to the Arctic Tern

with information on migration patterns and timing current status and changes in bird abundance and distribution and how Maine's geography and shifting climate mold its birdlife It delves into the conservation status for Maine's birds as well as the state's unusually textured ornithological history involving such famous names as John James Audubon and Theodore Roosevelt and home grown experts like Cordelia Stanwood and Ralph Palmer Sidebars explore diverse topics including the Old Sow whirlpool that draws multitudes of seabirds and the famed Monhegan Island a mecca for migrant birds Gorgeously illustrated with watercolors by Lars Jonsson and scores of line drawings by Barry Van Dusen Birds of Maine is a remarkable guide that birders will rely on for decades to come Copublished with the Nuttall Ornithological Club Strategic

Opportunism: What Works in Africa Brian John Huntley, 2023-02-28 This open access book provides a synthesis of six projects across ten countries each of which have been sustained for two or more decades and which illustrate how success can be achieved regardless of systems of governance of a nation's wealth or of culture Detailed narratives are presented on the key personalities that have conceived conducted and concluded long term projects personal stories of vision failure frustration and persistence ultimately leading to success The case studies vary widely in their geography and goals The single handed commitment to re-discover the last surviving populations of Giant Sable in the miombo woodlands of central Angola through the capture translocation and establishment of robust breeding herds of this magnificent antelope contrasts with the massively funded three decade programme with over one hundred participants that reversed the annual loss to predation by feral cats of 455 000 seabirds from a sub Antarctic island Similarly the foresight of Zimbabwean and Namibian ecologists to place rural communities at the centre of conservation programmes by giving value to wildlife populations and benefits to local people transformed a land degradation problem to a socio ecological solution Across ten countries building capacity in botanical collection documentation and herbarium management expanded into a global project to place the knowledge base of Africa's flora onto an electronic data system accessible to researchers and conservation planners in even the most remote corners of the continent None of these projects enjoyed immediate results Each required leadership skills that combined vision a generosity of spirit fortuitous timing and the exploitation of unexpected opportunities **Birds of Maryland,**
