Corporate Social Responsibility - Sustainable Business Rae Lindsay, Roger Martella, 2020-06-17 In a dramatic departure from its voluntary origins corporate social responsibility CSR is rapidly shifting to hold multinational companies accountable for more than traditional shareholder performance This CSR movement is embracing new environmental social and governance ESG frameworks that both promote global sustainability

goals and enhance accountability for negative impacts businesses can have on planet and people This collection of essays by leading businesspeople international civil servants legal practitioners academics and other experts offers a forward looking and pragmatic perspective that illuminates the major themes in this movement towards increasingly sustainable transparent and accountable business practices The collection shows how CSR has evolved to account for societal pressures environmental climate change and human rights impacts international policy imperatives and the practical challenges of regulating commercial activity that transcends borders The chapters offer an in depth examination of current issues including international frameworks and multistakeholder initiatives catalysing foundational change the shifting emphasis on corporate imperatives to avoid harm to third parties trends in CSR focused on assuring the planet s future sustainability and social stability regulatory initiatives around the globe including Europe North America Asia and Africa and extended accountability for activities of corporate group members and supply chains The pressure and business case for companies to incorporate CSR into corporate governance is intensifying with each quarter shareholder meeting and regulatory agenda The integration of CSR and new ESG frameworks into multinational corporate strategy and operations is key to sustainable business models that can generate long term value for the organization and all stakeholders Their acceptance as cornerstones of 21st century business practice appears inevitable Taking full account of the imperative for companies and their lawyers to grapple with the practical and legal challenges in this area this volume is an invaluable and pragmatic addition to the practitioners toolbox at this important juncture in an ever more dynamic field

Who's Doing What? A Closer Look at Methane Climate Impact and Commitments in Southeast Asia's Energy Sector Qiu Jiahui, 2024-06-20

This article draws from a database of asset level emissions to identify key methane emitting coal oil and gas facilities in Southeast Asia while taking stock of the methane commitments of their owners Coal mines account for around a third of fossil fuel methane emissions globally but in Southeast Asia they make up more than half of tracked fossil fuel methane emissions Over half of emissions from the coal mining subsector is traced to its top ten emitters mostly in East Kalimantan Indonesia while some coal mines in North Vietnam have high emissions intensities Though the global discourse on fossil methane focuses on oil and gas coal mine methane remains crucial for Southeast Asia due to the region s lack of decisive coal phaseout plans As countries begin to tackle coal emissions at the power generation stage a gap still remains when it comes to coal mining emissions Methane monitoring and abatement actions are urgently needed for coal mines that will continue to operate as well as those slated for closure More clarity is needed on how private sector commitments in the oil and gas sector will translate to action under complex and changing ownership arrangements These gaps and uncertainties in methane abatement are ripe opportunities for closer partnership in the region including within the private sector
