A. Stradling, 1994-01-01 This collection of essays contains an impressive body of the author's work on the history of Spain in the seventeenth century which has focused particularly on the issues of

high politics international strategy and military infrastructure The essays consistently illustrate R A Stradling's revisionist emphasis on aspects of the Spanish monarchy's survival as opposed to orthodox treatments fixated upon decline The major questions about Spain in the period are all addressed the quality of leadership in particular that of Olivares and his master Philip IV the effect of war and the strains imposed by the demands of military provision and the perception and reality of the decline Stimulating and immediate in style the great majority of the essays are the result of sustained research work in the archives of Spain and other western European countries as well as concentrated consideration of the broader contexts They are all concerned to highlight interpretation and relevance in a way that enlivens the specific issues under review
