straightforward Another assumption behind the science policy gap is the discrepancy between scientists and policy makers in terms of culture process timing language and expected outcome This book tries to reconcile this discrepancy through a multi stakeholder approach to authoring its different articles This joint initiative between the OECD particularly its Water Governance Initiative and the International Water Resources Association seeks to provide a canvas for grounding water policy in science and vice versa The objective of this book devoted to the OECD Principles on Water Governance is to use the OECD Principles as a common thread across the articles to draw lessons from theoretical work and practical experiences in water governance reforms but also to only feature papers authored by groups of diverse stakeholders from different institutional backgrounds This book was originally published as a special issue of Water International
