to describe the behaviour of enzymes in the test tube The formalism is particularly useful in the search for agents of therapeutic value as exemplified by methotrexate Uptake by mammalian cells of substrates and their metabolic conversions are discussed by van der Vusse and Reneman However both Welch and Savageau expound the view that the cell is not simply a bagful of enzymes The biologist is urged by Savageau to abandon Michaelis Menten formalism and apply the Power Law The biologist is also told that the approach to arriving at a theory of metabolic control would have to be one of successive approximations requiring the use of the computer Information gained from comparative biochemistry is shown by Storey and Brooks to have shed new light on mechanisms of metabolic rate depression and freeze tolerance and to be applicable to organ transplantation technology We are reminded that enzyme adaptation is partly the result of the presence of a hydrating shell of vicinal water that stabilises conformation of the enzyme Vicinal water according to Drost Hausen and Singleton lies adjacent to most solids and protein interfaces The kinks or breaks observed in the slope of the Arrhenius plot are attributed to structural changes in vicinal water Regulation of cell volume is shown by Hempling to involve regulation of cell water It could be that the osmo receptor or volume detection system is a protein that links the cytoskeleton to specific K and Cl channels Additionally it is interesting that aquaporins which are water channel forming membrane proteins are now known to exist in both renal and extra renal tissues One of the renal porins is affected by vasopressin We then pass on to protein synthesis Rattan and other important topics including protein glycosylation Hounsell methylation Clarke ADP ribosylation Pearson and prenylation Gelb Among the four types of lipids attached to membrane proteins are the prenyl groups Ford and Gross in their chapter on lipobiology drive home the point that there is an accumulation of acyl carnitine and lysophospholipids during myocardial infarction Whitaker's Cumulative Book List ,1986 *Energy Research Abstracts* ,1983 **Catalog of Copyright Entries.
