

The Earth's Surface

What can you see when you look at the planet of Earth?

Earth is covered mostly by water. These oceans are also home to lots of sea plants, as well as fish and other sea life.

The surface of Earth has changed a lot over time.

Space Exploration

We have learnt a lot about Earth from space. There are many satellites and spacecrafts, high above the Earth, that take photos and measurements and send them back to us.

This helps us learn more about the planet, including information about the weather and oceans.

A satellite is an object in space that orbits a larger object. The Moon is a natural satellite of Earth.
