

Introducing the
Powerwise™ QE 36 Volt Battery Charger

MAINTENANCE INSTRUCTIONS

1. For flooded lead-acid batteries, regularly check water levels of each battery cell after charging and add distilled water as required to level specified for battery manufacturer. Follow the safety instructions recommended by the battery manufacturer.
2. Make sure charger connections to battery terminals are tight and clean. Check for deformation/cracks in plastic parts. Check the charger harness for chaffing and rubbing. Inspect all wiring for fraying, loose terminals, chaffing, corrosion or deterioration of insulation.
3. Keep cooling fins free of contamination and do not expose charger to oil, dirt, mud or to direct heavy water spraying when cleaning equipment.
4. Inspect the plug of the battery charger and vehicle receptacle housing for dirt or debris. Monthly, or sooner if needed, clean the DC connector auxiliary contact. To clean the auxiliary contact, slide an ettery board between main contact and auxiliary contact located in the hole of the charger plug nearest the rounded corners. (See Cleaning Contact Figures). Press ettery board down to apply pressure to the auxiliary contact and slide board in and out of plug approximately 10 to 20 times, keeping pressure applied to the auxiliary contact surface. Repeat cleaning process if charger turns off while the handle is moved back and forth. If, after re-cleaning and retesting, the charger still turns off, check plug for a broken set wire or (X) cord.
