**Ethics and Law for School Psychologists** Susan Jacob, Dawn M. Decker, Elizabeth Timmerman Lugg, 2016-07-12 Ethics and Law for School Psychologists is the single best source of authoritative information on the ethical and legal issues school psychologists face every day. Designed specifically to meet the unique needs of psychologists in school settings, this book includes the most up-to-date standards and requirements while providing an introduction to ethical codes, ethical decision making, and the legal underpinnings that protect the rights of students and their parents. This new seventh edition has been extensively updated with the latest research and changes to the law, with an increased focus on ethical and legal considerations associated with the use of digital technologies. Coverage includes new case law on privacy rights, electronic record keeping, the 2014 Standards for Educational and Psychological Testing, digital assessment platforms, the latest interpretations of the Individuals with Disabilities Education Act, and more. Ethics texts for counseling and psychology are plentiful and often excellent, but this book is the only reference that speaks directly to the concerns and issues specific to psychologists in school settings. Case vignettes, end-of-chapter questions, and discussion topics facilitate deeper insight and learning, while updated instructor resources bring this key reference right into the classroom. Keeping up with the latest research and legal issues is a familiar part of a psychologist's duties, but a practice centered on children in an educational setting makes it both critical and more complex. Ethics and Law for School Psychologists provides a central resource for staying up-to-date and delivering ethically and legally sound services within a school setting.

**Entrepreneurship and Post-Pandemic Future** Anthony Abiodun Eniola, 2022-03-03 Entrepreneurship and Post-Pandemic Future illuminates entrepreneurship in the African setting, focusing on the prospects, challenges, as well as the post-pandemic future, and captures insights on the impact of Covid-19, the containment strategies that businesses are embracing to cope, and the post-pandemic future.

**Reconceptualising Power in Language Policy** Abhimanyu Sharma, 2022-08-12 This book aims to expand the theoretical framework of and counter the Eurocentric narratives in language policy research by comparing policies of EU and India and demonstrating the importance of taking a comparative perspective while studying language policies. This book challenges the notion of macro-level power in language policy research and offers evidence that in democratic frameworks, macro-level power is not absolute. It is not uniform across policy domains but rather susceptible to pressure, especially in the domains of healthcare and social welfare. This book makes three important contributions to the theory of language policy by: Arguing for the need to reconceptualise macro-level power; Proposing Categories of Differentiation as a new analytical tool for policy research; Demonstrating that socio-political changes are reflected at the textual level. This book is of interest to researchers working on language policies and those investigating language-related legislation across different policy domains to practitioners and policymakers in language policy, as well as to graduate students conducting comparative policy research. This is a much-valued and timely book making a strong case for the subject of language policy across Europe and India. The large comparative case studies of

four distinctive states across Europe and India in a simple descriptive mode makes the reading of this book enjoyable The domains of administration legislation healthcare and social welfare are undoubtedly novel ways to deal within the concept of language policy in a wider sense The author uses discourse analysis to bring out the relationship between intention explanation and interpretation of a phenomenon like language policy and its implementation The social diversity as expressed in linguistic mapping is well captured in the novel idea of categories of differentiation both as a normative methodological tool and its historical empirical manifestation Asha Sarangi Jawaharlal Nehru University New Delhi
