### Practical 1: Dissection of a sheep heart

#### Heart Dissection Walk Through :

The heart dissection is probably one of the most difficult dissections you will do. Part of the reason it is so difficult to learn is that the heart is not perfectly symmetrical, but it is so close that it becomes difficult to discern which side you are looking at (dorsal, ventral, left or right). Finding the vessels is directly related to being able to orient the heart correctly and figuring out which side you are looking at.

The heart is also difficult because the fatty tissue that surrounds the heart can obscure the openings to the vessels. This means that you really must experience the heart with your hands and feel your way to find the openings. Many people will be squeamish about this, and because the heart is slippery, it is easy to drop. Don't be shy with the heart; use your fingers to feel your way through the dissection.

#### 1. Step One: Orientation

When you first remove your heart from the bag, you will see a lot of fatty tissue surrounding it. It is usually a waste of time to try to remove this tissue. You may also want to arm yourself with some kind of markers for the parts you find, colour pencils work great to identify a vessel and you will see many used to mark openings on the heart.

There are a few clues to help you figure out the left and the right side, but often the packaging and preserving process can cause the heart to be misshapen. If you are lucky, the heart will be nicely preserved and you will see that the front (ventral) side of the heart has a couple of key features:

- 1) a large **pulmonary trunk(artery)** that extends off the top of it
- 2) the flaps of the **auricles** covering the top of the **atria**.
- 3) the **curve** of the entire **front side**, whereas the **backside** is much **flatter**.

Special Educational Needs and Inclusive Practices Fabio Dovigo, 2017-01-28 Today school is becoming a rapidly changing learning environment Thinking about students as a homogeneous population is no longer allowed as diversity in terms of culture language gender family organisation learning styles and so on has emerged as a key challenge for education today The debate on Special Educational Needs largely reflects this challenge as working in school implies careful reconsideration of what we mean by normal and special Current educational intervention is generally based on a deficit and within child model of facing SEN whereas very little attention is given to the role of learning environments The focus is on the child more than on the whole class and on cognition and technical provisions more than on affective sociocultural and community dimensions of learning Conversely regarding students and their needs as hidden voices allows us to adopt a transformative approach which sees diversity as a stimulus for the development of educational practices that might benefit all children and help school to become an inclusive and moving organisation The aim of the book is twofold on the one hand it offers a systematic overview of the inclusive education state of the art in six countries Germany Italy Norway Sweden UK and USA based on the contributions by well

known scholars such as Christy Ashby Barbara Brokamp Fabio Dovigo Kari Nes Mara Westling Allodi Tony Booth and Beth Ferri on the other hand the book analyses five cases of good practices of inclusion related to different subjects and school levels
