Policy Analysis as Problem Solving Rachel Meltzer, Alex Schwartz, 2025-02-03. In *Policy Analysis as Problem Solving*, authors Rachel Meltzer and Alex Schwartz provide a pragmatic yet fresh and original approach to the field. Emphasizing the importance of evidence and sound logic and drawing upon multiple perspectives and methods, the book guides readers through the process of making evidence-based decisions about policies. It offers a series of clear and comprehensive discussions about the key elements of the analytical process, beginning with steps to define the problem all the way until analysts arrive at a recommendation. The authors break from traditional approaches in their embrace of analytical flexibility and illustrate a broader framework for thinking about policy, both empowering and equipping readers to marshal a diverse array of evidence, techniques and evaluative criteria in their analyses. Case studies threaded throughout the book illustrate the different ways in which problems can be framed and the kinds of policies and criteria that may flow from these alternative framings. Focusing on child support, voter turnout, water shortage and short-term rental platforms, they also reveal the challenges and imperfect conditions that analysts encounter in the real world. Bolstered by an expanded scope, updates to its case studies and refinements to its central arguments, the second edition of *Policy Analysis as Problem Solving* remains an excellent go-to resource for students and aspiring analysts in policy analysis and public policy courses. The Politics of Policy Analysis Paul Cairney, 2021-02-10. This book focuses on two key ways to improve the literature surrounding policy analysis. Firstly, it explores the implications of new developments in policy process research on the role of psychology in communication and the multi-centric nature of policymaking. This is particularly important since policy analysts engage with policymakers who operate in an environment over which they have limited understanding and even less control. Secondly, it incorporates insights from studies of power, co-production, feminism and decolonisation to redraw the boundaries of policy-relevant knowledge. These insights help raise new questions and change expectations about the role and impact of policy analysis.

Accountability and Responsibility in Health Care Bruce Rosen, 2012. Serious

scholarly analyses of the types and roles of accountability in health care first appeared in the late 1980s. That issue, along with the related issue of responsibility in health care, has continued to interest policymakers, analysts, and scholars ever since. Indeed, there has been a renewed surge of interest in recent years with growing attention to the notion of accountable care organizations in the US, clinical audits in the UK, and governance as stewardship in many other countries. Accountability and responsibility in health care was also the theme of a major international conference organized by the Israel National Institute for Health Policy Research, which was held in Jerusalem in 2009. This book is a collection of scholarly articles on the themes of accountability and responsibility in health care and seeks to be the premier book in that field. It includes selected papers from the 2009 Jerusalem Conference, analytic essays on how accountability and responsibility are playing out in eight different countries, and reprints of some of the classic articles in the field. The book will interest policymakers, managers, researchers, and students, and many of the ideas presented here will help shape the development of this field in the years ahead. Some of these ideas have appeared in other forums; the unique contribution of this volume is that it is the first to bring together so many different perspectives on accountability and responsibility in health care. This volume will both acquaint readers with some of the latest thinking on accountability and responsibility in health care and will serve as a catalyst for future reflection, research, and writing in this area.
