Business Modelling Andrew B. Whinston,2002 Business modelling is a vast arena of research and practice which is gaining increasing important in the rapid development of e commerce globalization and in particular the movement toward global e business. The ability to utilize advanced computing technology to model analyse and simulate various aspects of ever changing businesses has made a significant impact on the way businesses are designed and run these days. With the current global e business and e commerce initiatives it has become important that all businesses carefully validate their business objectives requirements and strategies through a careful process of formal business modelling. It is important for effective enterprise decision making to have clear concise business models that allow the extraction of critical value from business processes and specify the rules to be globally enforced Particularly in e business specifications the need to be unambiguous accurate and complete becomes even greater because there may be no human mediator or agent to rely on in complex or unforeseen situations. Business Modelling Multidisciplinary Approaches Economics Operational and Information Systems. Perspectives arranged in three parts brings scholarly perspectives from various disciplines to bear on some of the critical aspects of business modeling. The first part chapters 1.8 focuses on business modelling fundamentals and starts with a series of economics and operations research perspectives. The second part chapters 9.19 concentrates on modelling in electronic businesses and focuses on Management Information Systems and Decision Support Systems. The third part chapters 20.22 centers on multidisciplinary business modelling progress in particular on the seminal work of Professor Andrew B. Whinston.

Practical Knowledge-Based Systems in Conceptual Design John C. Miles, Carolynne J. Moore, 2012-12-06 Conceptual Design is one of the few areas of Engineering Design where computers have yet to make an impact With the development of Knowledge Based Systems it is now possible to rectify this situation This publication deals with the use of Knowledge Based Systems KBS as tools for conceptual design Included are neglected aspects such as evaluation and user needs Practical Knowledge Based Systems in Conceptual Design is based on the authors experience of developing KBS for use in civil engineering an area of industrial application which is recognised as being one of great potential The methodology has been tried and tested by designers Examples of systems which have been developed to solve specific design problems are included.
