Pulpit and Nation Spencer W. McBride, 2017-01-12 In *Pulpit and Nation* Spencer McBride highlights the importance of Protestant clergymen in early American political culture elucidating the actual role of religion in the founding era Beginning with colonial precedents for clerical involvement in politics and concluding with false rumors of Thomas Jefferson's conversion to Christianity in 1817 this book reveals the ways in which the clergy's political activism and early Americans' general use of religious language and symbols in their political discourse expanded and evolved to become an integral piece in the invention of an American national identity Offering a fresh examination of some of the key junctures in the development of the American political system the Revolution the ratification debates of 1787-88 and the formation of political parties in the 1790s McBride shows how religious arguments sentiments and motivations were subtly interwoven with political ones in the creation of the early American republic Ultimately *Pulpit and Nation* reveals that while religious expression was common in the political culture of the Revolutionary era it was as much the calculated design of ambitious men seeking power as it was the natural outgrowth of a devoutly religious people

Commerce Business Daily, 1998-08 *Dikes and Revetments* Kristian Pilarczyk, 2017-11-22 Low lying countries such as the Netherlands are strongly dependent on good and safe sea defences In the past the design of dikes and revetments was mostly based on vague experience rather than on general valid calculation methods The demand for reliable design methods for protective structures has in the Netherlands resulted in increased research in this field These contributions have been prepared by Dutch experts participating in the study groups of the Technical Advisory Committee on Water Defences The book opens with an outline of general strategy and methodology on sea defences illustrated in the following chapters by technical information on specific items and Dutch experience and it ends with more general aspects such as probabilistic approach integral multifunctional design management safety assessment Together these chapters provide an almost complete technical overview of the items needed for the design and maintenance of dikes and revetments The enclosed CRESS program allows for an initial estimation of hydraulic loads and preliminary design

Music and Identity Politics

Ian Biddle, 2017-07-05 This volume brings together for the first time book chapters articles and position pieces from the

debates on music and identity which seek to answer classic questions such as how has music shaped the ways in which we understand our identities and those of others In what ways has scholarly writing about music dealt with identity politics since the Second World War Both classic and more recent contributions are included as well as material on related issues such as music's role as a resource in making and performing identities and music scholarship's ambivalent relationship with scholarly activism and identity politics The essays approach the music identity relationship from a wide range of methodological perspectives ranging from critical historiography and archival studies psychoanalysis gender and sexuality studies to ethnography and anthropology and social and cultural theories drawn from sociology and from continental philosophy and Marxist theories of class to a range of globalization theories The collection draws on the work of Anglophone scholars from all over the globe and deals with a wide range of musics and cultures from the Americas Australasia Europe the Middle East and Africa This unique collection of key texts which deal not just with questions of gender sexuality and race but also with other socially mediated identities such as social class disability national identity and accounts and analyses of inter group encounters is an invaluable resource for music scholars and researchers and those working in any discipline that deals with identity or identity politics Catalog of Copyright Entries. Soft Computing Evaluation Logic Jozo Dujmovic, 2018-09-10 A novel approach to decision engineering with a verified framework for modeling human reasoning Soft Computing Evaluation Logic provides an in depth examination of evaluation decision problems and presents comprehensive guidance toward the use of the Logic Scoring of Preference LSP method in modeling complex decision criteria Fully aligned with current developments in computational intelligence the discussion covers the design and use of LSP criteria for evaluation and comparison in diverse areas such as search engines medical conditions real estate space management habitat mitigation projects in ecology and land use and residential development suitability maps with versatile transfer to other similar decision modeling contexts Human decision making is rife with fuzziness imprecision uncertainty and half truths yet humans make evaluation decisions every day In this book such decision processes are observed analyzed and modeled The result is graded logic a soft computing mathematical infrastructure that provides both formal logic and semantic generalizations of classical Boolean logic Graded logic is used for logic aggregation in the context of evaluation models consistent with observable properties of human reasoning The LSP method based on graded logic and logic aggregation is a vital component of an industrial strength decision engineering framework Thus the book Provides detailed theoretical background for graded logic Provides a theory of logic aggregators Explains the LSP method for designing complex evaluation criteria and their use Shows techniques for evaluation comparison and selection of complex systems as well as the cost suitability analysis optimization sensitivity analysis tradeoff analysis and missingness tolerant aggregation Includes a survey of available LSP software tools including ISEE ANSY and LSP NT With quantitative modeling of human reasoning novel approaches to modeling decision criteria and a verified decision engineering framework

applicable to a broad array of applications this book is an invaluable resource for graduate students researchers and practitioners working within the decision engineering realm IPPC Procedure manual for implementation and capacity development Food and Agriculture Organization of the United Nations,IPPC Secretariat,2025-03-12 The Procedure manual for implementation and capacity development is composed of six sections 1 Implementation and Facilitation Unit of the IPPC Secretariat 2 Implementation and Capacity Development Committee IC 3 IC subgroups IC teams and working group 4 Specific IC subgroups 5 Specific IC teams and 6 Additional useful procedures The purpose of this manual is to provide a convenient consolidation of decisions procedures practices and forms used in the implementation and capacity development work in the IPPC community This manual will be revised annually to include any new decisions and procedures and to amend existing decisions and procedures as necessary Life-Cycle of Engineering Systems: Emphasis on Sustainable Civil Infrastructure Jaap Bakker,Dan M. Frangopol,Klaas Breugel,2016-11-18 This volume contains the papers presented at IALCCE2016 the fifth International Symposium on Life Cycle Civil Engineering IALCCE2016 to be held in Delft The Netherlands October 16 19 2016 It consists of a book of extended abstracts and a DVD with full papers including the Fazlur R Khan lecture keynote lectures and technical papers from all over the world All major aspects of life cycle engineering are addressed with special focus on structural damage processes life cycle design inspection monitoring assessment maintenance and rehabilitation life cycle cost of structures and infrastructures life cycle performance of special structures and life cycle oriented computational tools The aim of the editors is to provide a valuable source for anyone interested in life cycle of civil infrastructure systems including students researchers and practitioners from all areas of engineering and industry

Transportation, Land Use and Integration I.M. Schoeman,2017-05-30 For many years the integration of the location of land use and activities in spatial systems as well as the provision of transport in movement of goods services and people has been recognized as a challenge amongst various specialists including engineers transportation planners economists environmentalists urban and regional planners and developers The purpose of this book is to address transportation modelling in terms of technology techniques and methodology application in context to the interface between transportation systems land use planning and environmental challenges and application The methodology of transportation modelling is applied to international practices and application based on specific case studies inclusive of public transportation projects transportation modelling techniques in practice international research agenda network design and channel strategies strategic planning application of technology in traffic surveys and interpretation emissions from transportation systems application of mathematical models and the interface between environment land use and development in terms of location in space and the resulting activities Of value to both theorists and practitioners this book references the integration of transportation modelling techniques within an interdisciplinary environment inside all spatial systems *Extreme Hydrological Events: New Concepts for Security* O.F. Vasiliev,P.H.A.J.M.van Gelder,E.J. Plate,M.V. Bolgov,2007-06-17 This

proceedings contains the papers which were presented at the NATO Advanced Research Workshop ARW on Extreme Hydrological Events New Concepts for Security which was held in Novosibirsk Russia from July 11 15 2005 The workshop fell within the NATO priority research topic on Environmental Security Disaster Forecast and Prevention At the present time the necessity of considerable deepening of our understanding about the nature of extreme and catastrophic natural and man induced events in particular hydrologic ones becomes very topical as well as the development of advanced methods for their prediction including estimating probability of their occurrence and a risk related to them Another aspect of this hydrological problem is reducing of vulnerability of social economic and engineering systems to the extreme hydrologic events EHE and decreasing of a degree of their effect on such systems Dealing with these problems needs further refining existing tools for prediction and forecasting of EHE It can be done essentially through revealing mechanisms of their generation and with use of new approaches and methodologies in related branches of hydrology This ARW is targeted to contribute to the critical analysis and assessment of current knowledge on a number of the key issues of hydrology such as extreme hydrological phenomena problems of floods low flows and droughts In view of significant economic losses and actually wide geographical occurrence investigation of these hydrological phenomena is of great scientific and practical importance
