

smart roadster/roadster coupé (model 452)

The smart roadster and roadster coupé are equipped with a soft top or a coupé roof as standard equipment.

Soft top:

The locking and release mechanisms for the soft top are attached to the windshield frame and are operated automatically when the switch is pressed.

The control switch is located in the center console in front of the gearshift lever.

The soft top can only be opened completely if the voltage supply is present and the ignition is switched on.

When the folding top is open, the two side supports can be removed.

- Press the integrated safety switch (1)
- Fold the release lever (2) down
- Remove the side support

Smart Forfour User Manual:

Smart Thinking Tony Lewin, 2004 The story of smart is an epic tale of genius inspiration hope disappointment disaster and ultimate triumph Funky stylish and fun smart is the youngest and most exciting brand of car on the market and it has revolutionised the way we think about cars and the way we use them It has put much needed fun back into driving and even city motorists smile when they re at the wheel of a smart But it nearly didn t happen atall The revolutionary design was the product of the genius who invented the Swatch watch saving the near bankrupt Swiss watch industry in the process But these visionary ideas proved too radical and the tiny two seater almost died at birth when a succession of backers lost their nerve The sensational story of smart traces the decade long history of this ambitious project talking to key figures from every stage of the programme and building a vivid picture of an idea ahead of its time

Handbook of Smart Antennas for RFID Systems Nemaï Chandra Karmakar, 2011-02-25 The Handbook of Smart Antennas for RFID Systems is a single comprehensive reference on the smart antenna technologies applied to RFID This book will provide a timely reference book for researchers and students in the areas of both smart antennas and RFID technologies It is the first book to combine two of the most important wireless technologies together in one book The handbook will feature chapters by leading experts in both academia and industry offering an in depth description of terminologies and concepts related to smart antennas in various RFID systems applications Some topics are adaptive beamforming for RFID smart antennas multiuser interference suppression in RFID tag reading phased array antennas for RFID applications smart antennas in wireless systems and market analysis and case studies of RFID smart antennas This handbook will cover the latest achievements in the designs and applications for smart antennas for RFID as well as the basic concepts terms protocols systems architectures and case studies in smart antennas for RFID readers and tags

The Engineering Handbook of Smart Technology for Aging, Disability, and Independence Abdelsalam Helal, Mounir Mokhtari, Bessam Abdulrazak, 2008-08-20 An advanced look at smart technology to promote the independence of the elderly and disabled Ongoing research and advancements in technology are essential for the continuing independence of elderly and disabled persons The Engineering Handbook of Smart Technology for Aging Disability and Independence provides a thorough analysis of these technologies and the needs of the elderly and disabled including a breakdown of demographics government spending growth rate and much more Each chapter is written by an expert in his or her respective field and gives readers unparalleled insight into the research and developments in a multitude of important areas including User need analyses classifications and policies Assistive devices and systems for people with motor disabilities Assistive devices and systems for people with visual and hearing impairments Human machine interaction and virtual reality Assistive robotics Technology for user mobility and object manipulation Smart homes as assistant environments A discussion of emerging standards and guidelines to build accessible devices tools and environments This book is an indispensable resource for researchers and professionals in computer science rehabilitation

science and clinical engineering It also serves as a valuable textbook for graduate students in the aforementioned fields
