The Auditor's Guide to Blockchain Technology Shaun Aghili,2022-11-03 The 21st century has been host to a number of information systems technologies in the areas of science automotive aviation and supply chain among others But perhaps one of its most disruptive is blockchain technology whose origin dates to only 2008 when an individual or perhaps a group of individuals using the pseudonym Satoshi Nakamoto published a white paper entitled Bitcoin A peer to peer electronic cash system in an attempt to address the threat of double spending in digital currency Today many top notch global organizations are already using or planning to use blockchain technology as a secure robust and cutting edge technology to better serve customers The list includes such well known corporate entities as JP Morgan Royal Bank of

Canada Bank of America IBM and Walmart The tamper proof attributes of blockchain leading to immutable sets of transaction records represent a higher quality of evidence for internal and external auditors Blockchain technology will impact the performance of the audit engagement due to its attributes as the technology can seamlessly complement traditional auditing techniques Furthermore various fraud schemes related to financial reporting such as the recording of fictitious revenues could be avoided or at least greatly mitigated Frauds related to missing duplicated and identical invoices can also be greatly curtailed As a result the advent of blockchain will enable auditors to reduce substantive testing as inherent and control audit risks will be reduced thereby greatly improving an audit s detection risk As such the continuing use and popularity of blockchain will mean that auditors and information systems security professionals will need to deepen their knowledge of this disruptive technology If you are looking for a comprehensive study and reference source on blockchain technology look no further than The Auditor s Guide to Blockchain Technology Architecture Use Cases Security and Assurance This title is a must read for all security and assurance professionals and students looking to become more proficient at auditing this new and disruptive technology **Legislative Establishment Appropriation Bill** United States.

Planning Support Systems in Practice Stan Geertman,John Stillwell,2012-11-02 Planning Support Systems Technologies that are Driving Planning Michael Batty Centre for Advanced Spatial Analysis CASA University College London 1 19 Torrington Place London WC 1 E 6BT United Kingdom I had always thought the term Planning Support Systems abbreviated to PSS had been coined by the father of land use modelling Britton Harris in his article Beyond Geographic Information Systems computers and the planning professional published in the Journal of the American Planning Association in 1989 Harris 1989 Until I asked him that is In a response to a paper he gave to the Urban and Regional Information Systems Association URISA in the summer of 1987 he told me that someone in the audience who he cannot quite remember actually coined the term referring to planning support systems as that constellation of digital techniques such as GIS which were emerging to support the planning process In fact the predecessor term decision support systems DSS from which this unknown originator obviously defined PSS by analogy was coined as far back as the late 1970s in the management literature for a loose assemblage of techniques usually computer based which aided management decisions The term slowly entered the geographicallexicon as spatial decision support systems SDSS and this is probably first attributable to Lew Hopkins and Mark Armstrong who used it in a paper published in AutoCarto 7 in 1985 Hopkins and Armstrong 1985
