Smart Technique Manual Handling:

Intelligent and Fuzzy Techniques in Aviation 4.0 Cengiz Kahraman, Serhat Aydın, 2021-08-26 This book offers a comprehensive reference guide for the theory and practice of intelligent and fuzzy techniques in Aviation 4.0 It provides readers with the necessary intelligent and fuzzy tools for Aviation 4.0 when incomplete vague and imprecise information or insufficient data exist in hand where classical modeling approaches cannot be applied The respective chapters written by prominent researchers explain a wealth of both basic and advanced concepts including baggage services catering services check in and boarding services maintenance and cargo management security etc To foster reader comprehension all chapters include relevant numerical examples or case studies Taken together they form an excellent reference guide for researchers lecturers and postgraduate students pursuing research on Aviation 4.0 Moreover by extending all the main aspects of Aviation 4.0 to its intelligent and fuzzy counterparts the book presents a dynamic snapshot of the field that is expected to stimulate new directions ideas and developments

Intelligent and Fuzzy Techniques: Smart and Innovative Solutions Cengiz Kahraman, Sezi Cevik Onar, Basar Oztaysi, Irem Ucal Sari, Selcuk Cebi, A. Cagri Tolga, 2020-07-10 This book gathers the most recent developments in fuzzy machine learning risk assessment heuristics and clustering the book is a valuable resource for academics M Sc and Ph D students as well as managers and engineers in industry and the service sectors

Smart Ports Weijian Mi, Yuan Liu, 2022-03-12 This book demonstrates the concept of ecological system of the smart ports The innovation is emphasized as the essence of the ecological system as well as the prerequisite and foundation of sustainable development of smart ports The main supporting technologies of smart ports including cyber physical system middle office system blockchain artificial intelligence machine vision AR VR system simulation and emulation digital monitoring and diagnosis etc are introduced with concepts and development descriptions as well as practical application cases It could be used as demonstration and reference for the administrative staff engineers and technicians as well as researchers in construction and operation of smart ports

Intelligent Vehicles and Materials Transportation in the Manufacturing Sector: Emerging Research and Opportunities Bandyopadhyay, Susmita, 2017-07-12 The manufacturing industry has been optimized in recent years due to the rise of new technologies These advances have paved the way for the development of intelligent vehicles Intelligent Vehicles and Materials Transportation in the Manufacturing Sector Emerging Research and Opportunities is a pivotal source of scholarly research on the various aspects of manufacturing vehicles with intelligent technology components Including a range of perspectives on topics such as material handling automated guided vehicles and industrial robots this book is ideally designed for engineers academics professionals and practitioners actively involved in the manufacturing sector

Cost Management in Plastics Processing Robin Kent, 2017-09-29 Cost Management in Plastics Processing Strategies Targets Techniques and Tools Fourth Edition makes readers think about current practices and how to go forward with effective cost management This is a practical workbook that provides a structured approach to

reducing costs in plastics processing for all the major plastics shaping processes moulding extrusion forming as well as elsewhere in the company e g in factory services and non manufacturing areas Competition in all manufacturing sectors is increasing and there is continuous pressure to drive costs down and to increase cost management Good cost management improves profits and margins improves management control and opens the door to becoming a world class company The approach throughout this book looks rigorously at where costs are incurred and proposes projects and targets for cost reduction This book is designed to provide a well structured map broken down into simple tasks and achievable goals This book offers a structured approach to the techniques of cost management from how costs are calculated by accountants to the effective use of machines and labor to the minimization of waste It begins by looking at traditional methods of accounting and costing and whether these are helpful or accurate for project management Practical examples of cost management in plastics processing are included together with many useful flow charts and diagrams to illustrate the points under discussion Enables plastics processors to institute an effective cost management system going beyond simply trying to cut costs Provides a holistic perspective on cost management shining a light on areas on costs which may not have previously been considered or accounted for and proposing projects and targets for cost reduction Serves as a route map to help companies move toward improved margins and greater profitability

Recent Advances in Intelligent Manufacturing Harish Kumar, Prashant K. Jain, Saurav Goel, 2023-07-21 The book presents the select proceedings of the International Conference on Advancement in Manufacturing Engineering ICAME 2022 held at National Institute of Technology Delhi India during September 2 3 2022 It discusses the latest research in the area of industrial and production engineering Various topics covered in this book are precision engineering additive manufacturing computer aided manufacturing digital manufacturing intelligent control systems and optimization flexible manufacturing system smart manufacturing hybrid machining smart materials polymers ceramics and composites and their processing energy harvesting materials design thinking and prototyping product life cycle strategies Industry 4 0 etc The book is useful for researchers and professionals working in the area of industrial and production engineering

Sustainable Development Using Geospatial Techniques Disha Thakur, Sanjay Kumar, Har Amrit Singh Sandhu, Chander Prakash, 2024-10-29 This book is a must have for anyone interested in leveraging geospatial technology as it covers a wide range of applications and offers valuable insights into the mapping visualization and analysis of natural resource planning using GIS remote sensing and GPS Geospatial technology GT is a combination of geographic information systems GIS remote sensing RS and the global position system GPS for the mapping visualization and analysis of natural resource planning Nowadays GIS is widely used throughout the globe for a wide range of applications GIS is a system that combines locations geography hardware software statistics planning and digital mapping GIS is a system in which one can store manipulate analyze and visualize or display spatial data The basic components of GIS are hardware software data input and manpower One can develop spatial temporal and dynamic models using GIS which may help in effective decision

making tools Geospatial information is a computer programme that collects stores verifies and presents information on locations on the surface of the Earth Geographical information systems play a key role in sustainable development Geospatial technology combines traditional database operations like query and statistical analysis with the specific graphical and geographic analytical capabilities offered by maps

Advances in Manufacturing Technology XXXII P. Thorvald,K. Case,2018-08-29 The urgent need to keep pace with the accelerating globalization of manufacturing in the 21st century has produced rapid advancements in technology research and innovation This book presents the proceedings of the 16th International Conference on Manufacturing Research incorporating the 33nd National Conference on Manufacturing Research ICMR 2018 held in Sk vde Sweden in September 2018 The aim of the conference is to create a friendly and inclusive environment bringing together researchers academics and industrialists with practical and theoretical knowledge to share and discuss emerging trends and new challenges The book is divided into 12 parts covering areas such as the manufacturing process robots product design and development smart manufacturing and lean among others Covering both cutting edge research and recent industrial applications the book will appeal to all those with an interest in recent advances in manufacturing technology
